The Engineering Communication Manual Jul 05 2020 Engineering Communication Manual will serve the engineering communication and engineering design courses required for the undergraduate engineering student. Intended for the first-year engineering major as well as the student about to begin a professional career, the text addresses the writing issues and communication approaches specific to the discipline, like collaborative writing, field reporting, and poster presentations. Above all, the text asks students to synthesize elements of technical argument and to think critically about how they present content. Engineering Communication Manual's distinctive module-based format allows instructors to assign stand-alone readings and activities for the students, depending on their familiarity and experience with engineering communication and design projects. The direct format also complements the engineering student accustomed to "plug and chug" solutions. Accessible, dynamic, and full of relevant examples, Engineering Communication Manual focuses

on the student as well as reflects the worldview of the engineering professions. The text will be accompanied by instructor resources like assignments, prompts, and rubrics for specific learning objects; annotated samples of student work in several genres and media; and suggestions for using the book in different courses, like first-year design m lab courses, third-year technical communication or capstone design.

Challenging Chains to Change Dec 30 2019 Very often, efforts to improve value chains miss out half of the population -- the female half. It is men who sell the products and who keep the money from those sales. The women, who do much of the work but are not recognised for it, often have to work even harder to meet ever-increasing quality requirements. But they see few of the benefits. How to change this? This book explains how development organisations and private entrepreneurs have found ways to improve the position of women in value chains especially small-scale women farmers and primary processors. It outlines five broad strategies for doing this: (1) working with women on typical "women's products" such as shea, poultry and dairy, (2) opening up opportunities for women to work on what are traditionally "mens commodities" or in mens domains, (3) supporting women and men in organising for change by building capacity, organisation, sensitisation and access to finance, (4) using standards and certification to promote gender equity, and (5) promoting gender-responsible business. The book draws on dozens of cases from all over the world, covering a wide range of crops and livestock products. These include traditional subsistence products (such as rice), small-scale cash items (honey,

vegetables) as well as export commodities (artichokes, coffee) and biofuels (jatropha). The book includes a range of tools and methodologies for analysing and developing value chains with gender in mind. By bringing together the two fields of gender and value chains, this book offers a set of compelling arguments for addressing gender in value chain development. It proposes an analytical framework that builds on both fields. It outlines five strategies for development organisations and enterprises to ensure that women can participate in value chains as full partners and decision-makers. The overall result is to improve value chain performance, with both women and men able to enjoy the benefits.

Kill the Company Nov 01 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-

fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.
