**School Belonging in Adolescents** Nov 29 2019 This book explores the concept of school belonging in adolescents from a socio-ecological perspective, acknowledging that young people are uniquely connected to a broad network of groups and systems within a school system. Using a socio-ecological framework, it positions belonging as an essential aspect of psychological functioning for which schools offer unique opportunities to improve. It also offers insights into the factors that influence school belonging at the student level during adolescence in educational settings. Taking a socio-ecological perspective and drawing from innovative research methods, the book encourages researchers interested in school leadership to foster students' sense of belonging by developing their qualities and by changing school systems and processes

**Post-Conflict Reconstruction** Jun 24 2019 Violence and conflict are two of the greatest challenges the world will face in this millennium. Indeed, since the turn of the

century, it is estimated that approximately four million people have died as a result of armed conflict. Ending these seemingly intractable conflicts is a priority for global stability. However, the signing of the peace accord or the ending of formal hostilities does not automatically bring a return to normality in these fractured societies. In practice, it is more likely that these fractured societies will face a period in the twilight between war and peace, a time when the world turns its attention to new problems and seemingly more pressing matters, leaving the country to struggle towards peace and a new social order. The book's contributors deal with the challenges faced in creating the foundations for the development of a positive peace from a variety of multi-disciplinary perspectives, such as development studies, politics, psychoanalysis, psychology, sports studies and neuroscience. This breadth of perspectives offers innovative insights into the grey space between war and peace, which is home to millions of people across the globe and explores interventions which aim to create the conditions for positive post-conflict reconstruction.
