Self-directed multimodal learning in higher education Apr 22 2022 This book aims to provide an overview of theoretical and practical considerations in terms of self-directed multimodal learning within the university context. Multimodal learning is approached in terms of the levels of multimodality and specifically blended learning and the mixing of modes of delivery (contact and distance education). As such, this publication will provide a unique snapshot of multimodal practices within higher education through a self-directed learning epistemological lens. The book covers issues such as what self-directed multimodal learning entails, mapping of specific publications regarding blended learning, blended learning in mathematics, geography, natural science and computer literacy, comparative experiences in distance education as well as situated and culturally appropriate learning in multimodal contexts. This book provides a unique focus on multimodality in terms of learning and delivery within the context of self-directed learning. Therefore, the publication would not only advance the scholarship of blended and open distance learning in South Africa, but also the contribute to enriching the discourse regarding self-direction. From this book readers will get an impression of the latest trends in literature in terms of multimodal self-directed learning in South Africa as well as unique empirical work being done in this regard.

Reforming Higher Education in Vietnam Feb 08 2021 Vietnam is a dynamic member of the community of Southeast Asian nations. Consistent with aspirations across the region, it is seeking to develop its higher education system as rapidly as possible. Vietnam's approach stands out, however, as being extremely ambitious. Indeed, it may be at risk of attempting to do too much too quickly. By 2020, for example, Vietnam expects its higher education system to be advanced by modern standards and highly competitive in international terms. This vision faces many challenges. The economy, though growing rapidly, remains reliant on the availability of unskilled labour and the exploitation of natural resources, and decision making in many areas of public life continues to be hamstrung by a legacy of over-regulation and centralised control. A large number of goals and objectives have been set for reform of the higher education system by 2020. The success of these reforms will have a major bearing on the future quality of the system. This sober assessment Vietnam's global competitiveness forms a backdrop to the subject matter of this book, that is, the state of Vietnam's higher education system. The book provides a comprehensive and scholarly review of various dimensions of the higher education system in Vietnam, including its recent history, its structure and governance, its teaching and learning culture, its research and research commercialisation environment, its socio-economic impact, its strategic planning processes, its progress with quality accreditation, and its experience of internationalisation and privatisation.

The Political Economy of Education in South Asia Jan 27 2020 This book offers a comprehensive and accessible treatment of recent academic and policy studies of basic education in South Asia.

Education at a Glance 2019 OECD Indicators Aug 22 2019 Education at a Glance is the authoritative source for information on the state of education around the world. It provides data on the structure, finances and performance of education systems across OECD countries and a number of partner economies. The 2019 edition includes a focus on tertiary education with new indicators on tertiary completion rates, doctoral graduates and their labour market outcomes, and on tertiary admission systems, as well as a dedicated chapter on the Sustainable Development Goal 4.

Youth, Education, and Sexualities: K-Z Jul 25 2022 Featuring more than 200 entries, this work is an authoritative source for educators, researchers and students seeking an understanding of lesbian, gay, bisexual, and transgender (LGBT) youth. This work examines policy, practice and research concerning youth who are often the victims of bullying and harassment.

Shadow Education and the Curriculum and Culture of Schooling in South Korea Oct 28 2022 This book enables Western scholars and educators to recognize the roles and contributions of shadow education/hakwon education in an international context. The book allows readers to redefine the traditional and limited understanding of the background success behind Korean schooling and to expand their perspectives on Korean hakwon education, as well as shadow education in other nations with educational power, such as Japan, China, Singapore, and Taiwan. Kim exhorts readers and researchers to examine shadow education as an emerging research inquiry in the context of postcolonial and worldwide curriculum

studies.

Culture, Education, and Community Nov 24 2019 Provides a critical space in which to interrogate the ways in which postcolonial voices are imagined and struggle to be valued, heard, and responded to. Takes the imagination of the postcolonial as its focus, acknowledging that it is a troubling, unsettling, and ambiguous concept requiring re-visiting and re-interpretation.

Social Justice Language Teacher Education Jan 19 2022 Social justice language teacher education conceptualizes language teacher education as responding to social and societal inequities that result in unequal access to educational and life opportunities. In this volume authors articulate a global view of Social Justice Language Teacher Education, with authors from 7 countries offering a theorized account of their situated practices.

The Ethics Project in Legal Education Apr 10 2021 The contributions in this volume suggest that "the ethics project in legal education" is increasingly an international one. Even though the strength of commitment by both the profession and the legal academy to "ethics learning" within law schools varies, two fundamental questions confront all who work in this area. First, what is it that we want our students to learn (or, perhaps, in what manner do we want our students to develop) from the teaching of "legal ethics"? Second, how can we create a learning environment that will encourage the nature and quality of learning we think is important? All the contributors to this volume take a strong stand on the importance of ethical legal practice and the role of law schools in developing students' capacities in this area. They share a belief in the essential need to encourage law students to engage with the moral dimensions of legal practice. The questions that these scholars grapple with are therefore not of the "should we be teaching this?" variety, but "how might we best to go about doing this, so that our efforts within law schools really make some difference?" Each of the chapters in this volume adds uniquely to our understanding of these matters.

Decolonising Schools in South Africa Mar 09 2021 This book explores the challenge of dismantling colonial schooling and how entangled power relations of the past have lingered in post-apartheid South Africa. It examines the 'on the ground' history of colonialism from the vantage point of a small town in the Karoo region, showing how patterns of possession and dispossession have played out in the municipality and schools. Using the strong political and ontological critique of decoloniality theories, the book demonstrates the ways in which government interventions over many years have allowed colonial relations and the construction of racialised differences to linger in new forms, including unequal access to schooling. Written in an accessible style, the book considers how the dream of decolonial schooling might be realised, from the vantage point of research on the margins. This Karoo region also offers an interesting case study as the site where the world's largest radio telescope was recently located and highlights the contrasting logics of international 'big science' and local development needs. This book will be of interest to academics and scholars in the education field as well as to social geographers, sociologists, human geographers, historians and policy makers.

A Decade of Research on School Principals Dec 06 2020 This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history. Taken together, the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.

Digest of Education Statistics Sep 03 2020 Contains information on a variety of subjects within the field of education statistics, including the number of schools and colleges, enrollments, teachers, graduates, educational attainment, finances, Federal funds for education, libraries, international education, and research and development.

Education at a Glance May 11 2021 The OECD education indicators enable countries to see themselves in light of other countries performance. They reflect on both the human and financial resources invested in education and on the returns of these investments.

Blended Learning. Education in a Smart Learning Environment Jul 01 2020 This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning, ICBL 2020, held in Bangkok, in August 2020. The 33 papers presented were carefully reviewed and selected from 70 submissions. The conference theme of ICBL 2020 is Blended Learning : Education in a Smart Learning Environment. The papers are organized in topical sections named: Blended Learning, Hybrid Learning, Online Learning, Enriched and Smart Learning, Learning Management System and Content and Instructional Design.

Comparative Education Research Oct 04 2020 Approaches and methods in comparative education research are of obvious importance, but do not always receive adequate attention. This book contributes new insights within the longstanding traditions of the field. A particular feature is the focus on different units of analysis. Individual chapters compare places, systems, times, cultures, values, policies, curricula and other units. These chapters are contextualised within broader analytical frameworks which identify the purposes and strengths of the field. The book includes a focus on intra-national as well as cross-national comparisons, and highlights the value of approaching themes from different angles. The book will be of great value not only to producers of comparative education research but also to consumers who wish to understand more thoroughly the parameters and value of the field.

New Teacher Education for the Future Dec 18 2021 Serves to provide readers with an international understanding of how researchers and practitioners in different countries address some essential issues and initiatives in teacher education and development; what they have found from their known and applied research and what the implications are of which are

crucial to coping with challenges from the ongoing developments in teacher education.

Race for Education Feb 20 2022 An examination of families and schools in South Africa, revealing how the marketisation of schooling works to uphold the privilege of whiteness.

Teaching and Research in Contemporary Higher Education Sep 15 2021 This book discusses how teaching and research have been weighted differently in academia in 18 countries and one region, Hong Kong SAR, based on an international comparative study entitled the Changing Academic Profession (CAP). It addresses these issues using empirical evidence, the CAP data. Specifically, the focus is on how teaching and research are defined in each higher education system, how teaching and research are preferred and conducted by academics, and how academics are rewarded by their institution. Since the establishment of Berlin University in 1810, there has been controversy on teaching and research as the primary functions of universities and academics. The controversy increased when Johns Hopkins University was established in 1876 with only graduate programs, and more recently with the release of the Carnegie Foundation report Scholarship Reconsidered by Ernest L. Boyer in 1990. Since the publication of Scholarship Reconsidered in 1990, higher education scholars and policymakers began to pay attention to the details of teaching and research activities, a kind of 'black box' because only individual academics know how they conduct teaching and research in their own contexts.

International Handbook of Inter-religious Education Aug 02 2020 This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of, as well as collaboration between religions has essential educational value. The development of this Handbook rests on the f- ther assumption that interreligious education has an important role in elucidating the global demand for human rights, justice, and peace. Interreligious education reveals that the creeds and holy books of the world's religions teach about sp- itual systems that reject violence and the individualistic pursuit of economic and political gain, and call their followers to compassion for every human being. It also seeks to lead students to an awareness that the followers of religions across the world need to be, and to grow in, dialogical relationships of respect and understa- ing. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and, therefore, it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement, whose beg- ning is usually identi?ed with the World Parliament of Religions held in Chicago in 1893. This was the ?rst time in history that leaders of the eastern and we- ern religions had come together for dialogue, and to consider working together for global unity.

Silent Partners in Multicultural Education Jun 19 2019 This volume aims to stimulate interest in the under?researched role of silent partners (SPs) in multicultural education. Silent partners include formal and informal places?spaces in schools (e.g. architecture, classroom facilities, libraries, corridors, playgrounds, canteens), objects (e.g. teaching aids, furniture, wall decorations and overall interior design), interactive technologies (use of devices and applications) but also often taken?for?granted and not immediately visible patterns of thought, ideologies and assumptions. People involved in education all engage and work with a number of SPs that contribute to the delivery of curricula, but also to social life and well?being in and out of schools. The way places?spaces, objects and technologies influence the school community's experiences of learning, well?being and social justice is rarely observed and problematised in education – hence the adjective 'silent' in the term 'silent partners'. This book not only fills a significant empirical gap, but it can also inject public debate over future working environments in schools for multicultural education. It will be relevant to both researchers interested in developing their knowledge on these issues from a different perspective but also educators in search of inspiration for multicultural education. Praise for Silent Partners in Multicultural Education: "How to organize your classroom's configuration in such a manner that all pupils feel welcome and comfortable? While most of those invested in multicultural education focus on the optimization of various linguistic aspects, Itkonen, Dervin and their colleagues give voice to the non?verbal aspects of education. In this book they elaborate how formal and informal places?spaces in schools can unintentionally reflect ideologies and cultural assumptions. They illustrate this perspective with telling examples that come from what is widely perceived as one of the best educational systems in the world. This book is an important, innovative contribution to the question of inclusion of all pupils in our school systems. It provides an eye?opening perspective to researchers in the field, teachers, principals and stakeholders willing to work for social justice in their schools". ~ Emmanuelle Le Pichon, Vorstman, Researcher and Assistant Professor, Languages, Literature and Communication Department, Utrecht Institute of Linguistics "Congratulations are in order for this ground breaking and significant book. As the editors and authors convey convincingly and often poignantly, multicultural education is an increasingly politicised phenomenon that needs all the friends and allies that it can garner. The book's coverage of silent partners in education ? objects and technologies operating in specific places and spaces ? is therefore timely. Yet, as the book also highlights, these silent partners can exert negative power as well as positive influence on educational outcomes. The book presents a compelling account of the fundamental ambivalence framing these partners and formal educational provision more broadly. Rendering these silent educational partners visible and open to scrutiny is a significant scholarly achievement by the Education for Diversities Research Group in the Department of Teacher Education at the University of Helsinki, Finland, building on their well?deserved reputation for exploring the implicit and tacit and yet impactful dimensions of intercultural education and understanding. The book is appropriately diverse and inclusive in its concerns, with attention being directed at education in Finland, France, and the United States. Likewise the coverage traverses international and national schools, higher education, teacher education and productive methodologies for researching silent partners. This innovative and thought?provoking volume is highly recommended for its originality in helping us to see education for diversities in a new and powerful light." ~ Patrick Alan Danaher, Professor in Educational Research in the School of Linguistics, Adult and Specialist Education, Associate Dean (Research and Research Training) in the Faculty of Business, Education, Law and Arts, Toowoomba campus of the University of Southern Queensland, Australia; Adjunct Professor in the School of Education and the Arts, Central Queensland University, Australia. "Silent partners do not only reflect the ways we conceive of education but they also influence our practices as educators. Being silent, they are often taken for granted. The strength of this book lies in its critical questioning of the notion of silent partners. The chapters enlighten about the untold and the effects they have in an educational environment. The readers, especially in the fields of education and social justice, will definitely acquire a more sensitive perception of how silent partners affect our approaches to multicultural education." ~ Dr. Regis Machart, Senior Lecturer, Universiti Putra Malaysia; Adjunct Professor,

University of Helsinki, Finland

Science Education in Countries Along the Belt & Road Mar 21 2022 This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries,. We invited science education experts from 29 "Belt and Road" countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road. .

Education for Information Science in the Republic of Korea (South Korea) and the United States May 23 2022

Holocaust education in a global context Sep 27 2022 "International interest in Holocaust education has reached new heights in recent years. This historic event has long been central to cultures of remembrance in those countries where the genocide of the Jewish people occurred. But other parts of the world have now begun to recognize the history of the Holocaust as an effective means to teach about mass violence and to promote human rights and civic duty, testifying to the emergence of this pivotal historical event as a universal frame of reference. In this new, globalized context, how is the Holocaust represented and taught? How do teachers handle this excessively complex and emotionally loaded subject in fast-changing multicultural European societies still haunted by the crimes perpetrated by the Nazis and their collaborators? Why and how is it taught in other areas of the world that have only little if any connection with the history of the Jewish people? Holocaust Education in a Global Context will explore these questions."--page 10.

The First Century of the Republic Aug 14 2021

Education and the Creation of Capital in the Early American Republic Aug 26 2022 This book argues that schools were a driving force in the formation of social, political, and financial capital during the market revolution and capitalist transition of the early republican era. Grounded in an intensive study of schooling in the Genesee Valley region of upstate New York, it traces early sources of funding and support for education (including common schools and various forms of higher schooling) to their roots in different social and economic networks and trade and credit relations. It then interprets that story in the context of other major developments in early American social, political, and economic history, such as the shift from agricultural to non-agricultural production, the integration of rural economies into translocal capitalist markets, the organization of the Second Great Awakening, the transformation of patriarchy, the expansion of white male suffrage, the emergence of the Secondary American Party System, and the formation of the modern liberal state.

Developing Adult Literacy Jan 07 2021 This book will help those who plan and develop literacy initiatives; using case studies from literacy programmes in many countries including Egypt, India, Indonesia, Mali, Nigeria, the Philippines and Uganda, it demonstrates the importance of literacy, its power to improve lives, and the role literacy plays in social and economic development.

The Requirements for Stability and Development in KwaZulu and Natal Apr 29 2020

Refugees, Immigrants, and Education in the Global South Nov 17 2021 The unprecedented human mobility the world is now experiencing poses new and unparalleled challenges regarding the provision of social and educational services throughout the global South. This volume examines the role played by schooling in immigrant incorporation or exclusion, using case studies of Thailand, India, Nepal, Hong Kong/PRC, the Philippines, the United Arab Emirates, Jordan, Kenya, Egypt, South Africa, Senegal, Sudan, Mexico, and the Dominican Republic. Drawing on key concepts in anthropology, the authors offer timely sociocultural analyses of how governments manage increasing diversity and how immigrants strategize to maximize their educational investments. The findings have significant implications for global efforts to expand educational inclusion and equity.

Report of the Minister of Education Jul 13 2021

Education in Africa Dec 26 2019 First published in 1982, Education in Africa offers a comprehensive treatment of the development of education in Africa. Until now only scattered documents on educational growth in individual countries have been available; works devoted to Africa as a whole have tended towards the general and have, by and large, been written by outside observers. This book is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they represent eleven nations in all. The volume is designed for African students, teachers and administrators and will also be welcomed by educational planners and by scholars working in the fields of comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

Handbook of Global Education Policy Jul 21 2019 This innovative new handbook offers a comprehensive overview of the ways in which domestic education policy is framed and influenced by global institutions and actors. Surveys current debates about the role of education in a global polity, highlights key transnational policy actors, accessibly introduces research methodologies, and outlines global agendas for education reform Includes contributions from an international cast of established and emerging scholars at the forefront of the field thoughtfully edited and organized by a team of world-renowned global education policy experts Each section features a thorough introduction designed to facilitate readers' understanding of the subsequent material and highlight links to interdisciplinary global policy scholarship Written in an accessible and engaging style that will appeal to domestic and international policy practitioners, social scientists, and education scholars alike

Comparative Studies in Special Education Nov 05 2020 Describes how, by opening regular classes to hearing impaired students at the John H. Kinzie Elementary School, new principal James Burke began the efforts that helped the school overcome the racial conflicts and desegregation mandates that threatened its survival.
