Mushrooms traded as food. Vol II sec 2 Mar 13 2021 Mushrooms recognised as edible have been collected and cultivated for many years. In the Nordic countries, the interest for eating mushrooms has increased. In order to ensure that Nordic consumers will be supplied with safe and well characterised, edible mushrooms on the market, this publication aims at providing tools for the in-house control of actors producing and trading mushroom products. The report is divided into two volumes: a. Volume I: "Mushrooms traded as food - Nordic questionnaire and guidance list for edible mushrooms suitable for commercial marketing b. Volume II: Background information, with general information in section 1 and in section 2, risk assessments of more than 100 mushroom species All mushrooms on the lists have been risk assessed regarding their safe use as food, in particular focusing on their potential content of bioactive constituents.

[Travelling Concepts in the Humanities](#) Sep 30 2022 Attempting to bridge the gap between specialised scholarship in the humanistic disciplines and an interdisciplinary project of cultural analysis, Mieke Bal has written an intellectual travel guide that charts the course 'beyond' cultural studies. As with any guide, it can be used in a number of ways and the reader can follow or willfully ignore any of the paths it maps or signposts. Bal's focus for this book is the idea that interdisciplinarity in the humanities - necessary, exciting, serious - must seek its heuristic and methodological basis in concepts rather than its methods. Concepts are not grids to put over an object. The counterpart of any given concept is the cultural text or work or 'thing' that constitutes the object of analysis. No concept is meaningful for cultural analysis unless it helps us to understand the object better on its own terms. Bal offers the reader a sustained theoretical reflection on how to 'do' cultural analysis through a tentative practice of doing just that. This offers a concrete practice to theoretical constructs, and allows the proposed method more accessibility. [The Language of Greek Comedy](#) May 03 2020 The contributions to this volume illustrate how the linguistic study of Greek comedy can deepen our knowledge of the intricate connections between the dramatic texts and their literary and socio-cultural environment. Topics discussed include the relationship of comedy and iambus, the world of Doric comedy in Sicily, figures of speech and obscene vocabulary in Aristophanes, comic elements in tragedy, language and cultural identity in fifth-century Athens, linguistic characterization in Middle Comedy, the textual transmission of New Comedy, and the interaction of language and dramatic technique in Menander. Research in these topics and in related areas is reviewed in an extensive bibliographical essay. While the main focus is on comedy, the diversity of the approaches adopted (including narratology, pragmatics, lexicology, dialectology, sociolinguistics, and textual criticism) ensures that much of the work applies to different genres and is relevant also to linguists and literary scholars.

Guide to the Study of Ancient Magic Dec 22 2021 This volume seeks to advance the study of ancient magic through separate discussions of ancient terms for ambiguous or illicit ritual, the ancient texts commonly designated magical, and contexts in which the term magic may be used descriptively.

Inscriptions and Their Uses in Greek and Latin Literature Dec 10 2020 From the archaic period onwards, ancient literary authors working within a range of genres discussed and quoted a variety of inscriptions. This volume offers a wide-ranging set of perspectives on the diversity of epigraphic material present in ancient literary texts, and the variety of responses, both ancient and modern, which they can provoke.

[Kill the Company](#) Feb 09 2021 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace

small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

[The Statue of Zeus at Olympia](#) Jul 17 2021 This book began to take shape following a conference on the Statue of Zeus at Olympia held at the University of Queensland in July 2008. In line with the main themes of the conference, the book has two fundamental aims: the first is to recognise the unsurpassed reputation of the Zeus in antiquity, to move beyond the framework provided by the Seven Wonders of the Ancient World, and to treat the famous statue in depth, as befits its unique importance in ancient times; the second aim is to employ a variety of interdisciplinary perspectives in the hope of capturing more accurately than before something of that unique importance. The book is aimed at academic specialists in a variety of disciplines (such as art, archaeology, history, literature, and cultural poetics), though it is also intended to be accessible to undergraduates and certainly to research students. The audience will primarily be one interested in classical antiquity, but there are chapters which trace the story and influence of the Zeus through the Byzantine, Renaissance, and early modern periods, and into more recent centuries in both the northern and southern hemispheres.

Aulus Gellius Apr 01 2020 Aulus Gellius originated the modern use of 'classical' and 'humanities'. His Attic Nights, so named because they began as the intellectual pastime of winter evenings spent in a villa outside Athens, are a mine of information on many aspects of antiquity and a repository of much early Latin literature which would otherwise be lost; he took a particular interest in questions of grammar and literary style. The whole work is interspersed with interesting personal observations and vignettes of second-century life that throw light on the Antonine world. In this, the most comprehensive study of Gellius in any language, Dr Holford-Strevens examines his life, his circle of acquaintances, his style, his reading, his scholarly interests, and his literary parentage, paying due attention to the text, sense, and content of individual passages, and to the use made of him by later writers in antiquity, the Middle Ages, the Renaissance, and more recent times. It covers many subject areas such as language, literature, history, law, rhetoric, medicine; light is shed on a wide range of problems in Greek as well as Latin authors, either in the main text or in the succinct but wide-ranging footnotes. In this revised edition every statement has been reconsidered and account taken of recent work by the author and by others; an appendix has been added on the relation between the literary trends of Latin (the so-called archaizing movement) and Greek (Atticism) in the second century AD, and more space has been given to Gellius' attitudes towards women, as well as to recurrent themes such as punishment and embassies. The opportunity has been taken to correct or excise errors, but otherwise nothing has been removed unless superseded by more recent publications.
