Raider's Peril Oct 09 2020 Katka's heart pumped against her ribs... battles like this were what Raider's Peril was all about. Eleven-year-old Katka feels most at home when she is not being Katka. By day, she attends school like the rest of her friends, but by night, Catanna Brittlestar adventures around the White Desert in search of prestige and precious gems, with her loyal guild in tow. Then, the lines between her two worlds begin to blur – Katka thought Raider's Peril was just a game, but some players are raiding for real... The Biggest Book of Reproducible Books, Grades 1 - 3 May 16 2021 Write on! Write with

students in grades 1–3 using *The Biggest Book of Reproducible Books!* This 160-page resource provides creative templates for making all kinds of books. It includes seven books: *My Spelling Book*, *My Photo Picture Dictionary*, *My Journal*, *My Storybook*, *My Phonics Book*, *My “All About Me” Book*, and *My Year Book*. This book also includes templates for two newspapers, four graphic novels, one accordion book, and six shape books. It supports NCTE standards.

Discourse and Language Education Jan 12 2021 *Discourse and Language Education* is part of the Cambridge Language Teaching Library series. Discourse analysis describes how such communication is structured, so that it is socially appropriate and linguistically accurate. This book gives practical experience in analyzing discourse and the study of written language. The analyses show the ways we use linguistic signals to carry out our discourse goals and the differences between written and spoken language as well as across languages. This text can be used as a manual in teacher education courses and linguistics and communications courses. It will be of great interest to second language teachers, foreign language teachers, and special education teachers (especially those involved with the hearing impaired).

Managing Public Money Nov 21 2021

R Markdown Jun 28 2022 *R Markdown: The Definitive Guide* is the first official book authored by the core R Markdown developers that provides a comprehensive and accurate

reference to the R Markdown ecosystem. With R Markdown, you can easily create reproducible data analysis reports, presentations, dashboards, interactive applications, books, dissertations, websites, and journal articles, while enjoying the simplicity of Markdown and the great power of R and other languages. In this book, you will learn

Basics: Syntax of Markdown and R code chunks, how to generate figures and tables, and how to use other computing languages

Built-in output formats of R Markdown: PDF/HTML/Word/RTF/Markdown documents and ioslides/Slidy/Beamer/PowerPoint presentations

Extensions and applications: Dashboards, Tufte handouts, xaringan/reveal.js presentations, websites, books, journal articles, and interactive tutorials

Advanced topics: Parameterized reports, HTML widgets, document templates, custom output formats, and Shiny documents.

Yihui Xie is a software engineer at RStudio. He has authored and co-authored several R packages, including knitr, rmarkdown, bookdown, blogdown, shiny, xaringan, and animation. He has published three other books, *Dynamic Documents with R and knitr*, *bookdown: Authoring Books and Technical Documents with R Markdown*, and *blogdown: Creating Websites with R Markdown*. J.J. Allaire is the founder of RStudio and the creator of the RStudio IDE. He is an author of several packages in the R Markdown ecosystem including rmarkdown, flexdashboard, learnr, and radix. Garrett Golemund is the co-author of *R for Data Science* and author of *Hands-On Programming with R*. He wrote the lubridate R package and works for RStudio as an advocate who trains engineers to do

data science with R and the Tidyverse.

Pro WordPress Theme Development Sep 07 2020 Pro WordPress Theme Development is your comprehensive guide to creating advanced WordPress themes. Designed for professional web designers and developers who are comfortable with PHP and WordPress, this book teaches you every aspect of professional theme development. You will learn how to build themes from scratch, how to monetize the themes you create, and how to capitalize on this by creating advanced themes for your clients or selling premium themes. This book builds on your current knowledge of PHP and web development to create a WordPress theme from scratch. It uses a real-world theme example that you can build, to demonstrate each feature in a practical way. It shows you how to take control of WordPress with custom posts types and taxonomies, and covers anatomy and hierarchy, use of the loop, hooks, short codes, plug-ins and much more. WordPress is one of the most successful open-source blogging and content management systems available, and theme development has become a major part of the WordPress ecosystem. Start working with WordPress themes like a pro today with Pro WordPress Theme Development.

Monty Python and Philosophy Jan 24 2022 Humour.

Inducing Event Schemas and Their Participants from Unlabeled Text Aug 19 2021 The majority of information on the Internet is expressed in written text. Understanding and extracting this information is crucial to building intelligent systems that can organize this

knowledge, but most algorithms focus on learning atomic facts and relations. For instance, we can reliably extract facts like "Stanford is a University" and "Professors teach Science" by observing redundant word patterns across a corpus. However, these facts do not capture richer knowledge like the way detonating a bomb is related to destroying a building, or that the perpetrator who was convicted must have been arrested. A structured model of these events and entities is needed to understand language across many genres, including news, blogs, and even social media. This dissertation describes a new approach to knowledge acquisition and extraction that learns rich structures of events (e.g., plant, detonate, destroy) and participants (e.g., suspect, target, victim) over a large corpus of news articles, beginning from scratch and without human involvement. As opposed to early event models in Natural Language Processing (NLP) such as scripts and frames, modern statistical approaches and advances in NLP now enable new representations and large-scale learning over many domains. This dissertation begins by describing a new model of events and entities called Narrative Event Schemas. A Narrative Event Schema is a collection of events that occur together in the real world, linked by the typical entities involved. I describe the representation itself, followed by a statistical learning algorithm that observes chains of entities repeatedly connecting the same sets of events within documents. The learning process extracts thousands of verbs within schemas from 14 years of newspaper data. I present novel contributions in the field of temporal ordering to build classifiers that order the

events and infer likely schema orderings. I then present several new evaluations for the extracted knowledge. Finally, I apply Narrative Event Schemas to the field of Information Extraction, learning templates of events with sets of semantic roles. Most Information Extraction approaches assume foreknowledge of the domain's templates, but I instead start from scratch and learn schemas as templates, and then extract the entities from text as in a standard extraction task. My algorithm is the first to learn templates without human guidance, and its results approach those of supervised algorithms.

Jumbo Book of Writing Lessons Mar 14 2021 Provides information on the traits of good writing, the steps of the writing process, and the guidelines for incorporating writing into literacy instruction.

Project-Based Activities, Grades 6 - 8 Apr 26 2022 Build teamwork, enhance communication, and refine critical thinking with Mark Twain Project-Based Activities for sixth–eighth grades. The exercises in this book require students to collaborate while creating graphic novels, virtual systems, book trailers, school brochures, and more. To achieve success, it is essential to work together to accomplish goals— both in and out of the classroom. Project-Based Activities promotes teamwork while challenging students to: - create unforgettable story characters -utilize informational text -write argumentative essays -cite sources -use explanatory writing -write book reviews Mark Twain Media Publishing Company provides engaging supplemental books and eye-catching decorations for middle-

grade and upper-grade classrooms. This product line is designed by leading educators and features a variety of subjects, including history, fine arts, science, language arts, social studies, government, math, and positive behavior.

Artificial Intelligence and Work Mar 02 2020

Advances in Automatic Text Summarization Feb 22 2022 ntil now there has been no state-of-the-art collection of themost important writings in automatic text summarization. This bookpresents the key developments in the field in an integrated frameworkand suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on-line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches, Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem

Areas. Contributors D. A. Adams, C. Aone, R. Barzilay, E. Bloedorn, B. Boguraev, R. Brandow, C. Buckley, F. Chen, M. J. Chrzanowski, H. P. Edmundson, M. Elhadad, T. Firmin, R. P. Futrelle, J. Gorlinsky, U. Hahn, E. Hovy, D. Jang, K. Sparck Jones, G. M. Kasper, C. Kennedy, K. Kukich, J. Kupiec, B. Larsen, W. G. Lehnert, C. Lin, H. P. Luhn, I. Mani, D. Marcu, M. Maybury, K. McKeown, A. Merlino, M. Mitra, K. Mitze, M. Moens, A. H. Morris, S. H. Myaeng, M. E. Okurowski, J. Pedersen, J. J. Pollock, D. R. Radev, G. J. Rath, L. F. Rau, U. Reimer, A. Resnick, J. Robin, G. Salton, T. R. Savage, A. Singhal, G. Stein, T. Strzalkowski, S. Teufel, J. Wang, B. Wise, A. Zamora

Student Voice Jun 24 2019 Promote student self worth and engagement with these one-of-a-kind activities! Promote student self-expression, values, hopes and dreams with this extraordinary activity book from experts Dr. Russell Quaglia, Michael Corso and Julie Hellerstein. Based on hundreds of interviews, timesaving and easy-to-implement activities help you to: Foster student engagement, purpose, leadership and self worth Provide creative and challenging activities for all levels Align activities with Common Core and ISTE Standards and 21st Century Skills Capitalize on technology and promote interdisciplinary connections Includes a handy correlation chart and extended learning opportunities. This inspiring, one-of-a-kind book will help your 6th-12th grade students soar to success!

The Green Book Jul 30 2022 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation

across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

iPhone iOS 5 Development Essentials May 04 2020 Now updated with five new chapters dedicated to Xcode Storyboards, the aim of iPhone iOS 5 Development Essentials is to teach you the skills necessary to build your own applications for the iPhone. Beginning with the basics, this book provides an overview of the iPhone hardware and the architecture of iOS 5. An introduction to programming in Objective-C is provided followed by an in-depth look at the design of iPhone applications and user interfaces. More advanced topics such as user interface layout and resizing, file handling, database management, graphics drawing and animation are also covered, as are touch screen handling, gesture recognition, multitasking, iAds integration, location and map management, camera access and video playback support. New iOS 5 specific features are also covered in detail including page view controller implementation, the UIDocument class, iCloud based storage, Storyboard user interface design, automatic reference counting, Twitter integration and image filtering with Core Image. iPhone iOS 5 Development Essentials takes a modular approach to the subject of iPhone application development with each chapter covering a self contained topic area. This makes the book both an easy to follow learning aid and an excellent reference

resource.

Professional Sitecore 8 Development Jul 06 2020 Structure templates and content within Sitecore, work with integrated tools, and leverage its extensive automation capabilities. Sitecore was recently recognized as one of the most reputable and reliable, enterprise-class web content management solutions (WCMS) available in the marketplace. Thousands of companies are using Sitecore to manage their digital experiences online. Because Sitecore is such a large, complex platform, developers often have a hard time coming up to speed, even after completing a Sitecore training course for developers. However, leveraging the design patterns and other practices laid out in this book will make that transition much easier. Professional Sitecore 8 Development provides a soup-to-nuts approach for a Sitecore rookie to come up to speed quickly, as well as provide more advanced techniques for seasoned veterans that they may not be exposed to otherwise. Key coverage areas include: Getting started with Sitecore development Front-end development techniques Incorporating design patterns into your Sitecore solutions Unit testing Sitecore applications Programming Sitecore's marketing capabilities Sitecore automation with PowerShell Advanced development techniques What you'll learn Develop solutions on the Sitecore platform Come up to speed on Sitecore without going through a training class Build front-end (HTML, CSS, Angular, etc.) solutions as well as back-end (C#) solutions on Sitecore Incorporate design patterns into your Sitecore solutions Make use of advanced Sitecore

development techniques Who This Book Is For The book is a developer's companion, both front end and back end developers. The target audience is both developers who have zero Sitecore experience, as well as seasoned veterans looking for advanced best practices. A secondary audience would be Sitecore administrators who would benefit from discussions around performance tuning and security.

Florida's Hurricane History Dec 23 2021 The Sunshine State has an exceptionally stormy past. Vulnerable to storms that arise in the Atlantic, Caribbean, and Gulf of Mexico, Florida has been hit by far more hurricanes than any other state. In many ways, hurricanes have helped shape Florida's history. Early efforts by the French, Spanish, and English to claim the territory as their own were often thwarted by hurricanes. More recently, storms have affected such massive projects as Henry Flagler's Overseas Railroad and efforts to manage water in South Florida. In this book, Jay Barnes offers a fascinating and informative look at Florida's hurricane history. Drawing on meteorological research, news reports, first-person accounts, maps, and historical photographs, he traces all of the notable hurricanes that have affected the state over the last four-and-a-half centuries, from the great storms of the early colonial period to the devastating hurricanes of 2004 and 2005--Charley, Frances, Ivan, Jeanne, Dennis, Katrina, and Wilma. In addition to providing a comprehensive chronology of more than one hundred individual storms, *Florida's Hurricane History* includes information on the basics of hurricane dynamics, formation, naming, and forecasting. It

explores the origins of the U.S. Weather Bureau and government efforts to study and track hurricanes in Florida, home of the National Hurricane Center. But the book does more than examine how hurricanes have shaped Florida's past; it also looks toward the future, discussing the serious threat that hurricanes continue to pose to both lives and property in the state. Filled with more than 200 photographs and maps, the book also features a foreword by Steve Lyons, tropical weather expert for the Weather Channel. It will serve as both an essential reference on hurricanes in Florida and a remarkable source of the stories--of tragedy and destruction, rescue and survival--that foster our fascination with these powerful storms.

MLA Made Easy: Citation Basics for Beginners Mar 26 2022 A concise, handy guidebook for teaching correct MLA-style citation to middle and high school researchers.

The Landry News Oct 01 2022 NEW STUDENT GETS OLD TEACHER The bad news is that Cara Landry is the new kid at Denton Elementary School. The worse news is that her teacher, Mr. Larson, would rather read the paper and drink coffee than teach his students anything. So Cara decides to give Mr. Larson something else to read—her own newspaper, The Landry News. Before she knows it, the whole fifth-grade class is in on the project. But then the principal finds a copy of The Landry News, with unexpected results. Tomorrow's headline: Will Cara's newspaper cost Mr. Larson his job?

32 Quick & Fun Content-area Computer Activities Grade 4 Apr 02 2020 Incite 4th

grade students enthusiasm to learn using technology in the curriculum! You'll enhance learning and encourage high-order thinking by incorporating a technology project for every week of the school year. Students will develop key technology skills in word processing, spreadsheets, multimedia presentations, and using the Internet while you teach regular classroom content. Lessons are divided among content areas, and the flexible projects are great for computer centers, labs, or one-computer classrooms. The easy-to-follow teacher instructions and step-by-step student directions make this resource a hit in the classroom. The included Teacher Resource CD contains sample projects, templates, and assessment rubrics. 160pp.

Adaptive Hypermedia and Adaptive Web-Based Systems Sep 19 2021 Here are the refereed proceedings of the 4th International Conference on Adaptive Hypermedia and Adaptive Web-Based Systems, AH 2006, held in Dublin, Ireland, June 2006. The book presents 22 revised full papers and 19 revised short papers together with abstracts of 3 keynotes, 12 poster papers, and 14 doctoral consortium posters. Topics include pioneering theories, techniques, and innovative technologies to provide dynamic personalization, adaptation, and contextualization of hypermedia resources and services.

Designing for Newspapers and Magazines Oct 21 2021 A hugely beneficial introduction to students and professionals in print media and design, *Designing for Newspapers and Magazines* offers guidance on how to produce attractive publications and how to tailor them

to their target audience using colour, text placement, typography and images. Written by an experienced journalist and designer, the book details the elements of good design and provides instruction on how to get the most of computers and computer-aided design. The book examines a broad range of local and national publications including The Sun, The Daily Mirror and Glamour magazine and explains the reasoning that underpins their design choice, including: how to set up a new publication planning an edition of a newspaper or magazine typography and working with text working with images and technical production designing pages and how to use colour design and journalism ethics a glossary of journalistic and design terms

SharePoint 2010 ABC Jul 18 2021

Beyond Constructivism Aug 07 2020 This book has two primary goals. On the level of theory development, the book clarifies the nature of an emerging "models and modeling perspective" about teaching, learning, and problem solving in mathematics and science education. On the level of emphasizing practical problems, it clarifies the nature of some of the most important elementary-but-powerful mathematical or scientific understandings and abilities that Americans are likely to need as foundations for success in the present and future technology-based information age. *Beyond Constructivism: Models and Modeling Perspectives on Mathematics Problem Solving, Learning, and Teaching* features an innovative Web site housing online appendices for each chapter, designed to supplement the

print chapters with digital resources that include example problems, relevant research tools and video clips, as well as transcripts and other samples of students' work:

<http://tcct.soe.purdue.edu/booksULandULjournals/modelsULandULmodeling/> This is an essential volume for graduate-level courses in mathematics and science education, cognition and learning, and critical and creative thinking, as well as a valuable resource for researchers and practitioners in these areas.

Information Modelling and Knowledge Bases XX May 28 2022 Focuses on theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy.

Algorithmic Learning Theory Jun 16 2021 This book constitutes the refereed proceedings of the 10th International Conference on Algorithmic Learning Theory, ALT'99, held in Tokyo, Japan, in December 1999. The 26 full papers presented were carefully reviewed and selected from a total of 51 submissions. Also included are three invited papers. The papers are organized in sections on Learning Dimension, Inductive Inference, Inductive Logic Programming, PAC Learning, Mathematical Tools for Learning, Learning Recursive Functions, Query Learning and On-Line Learning.

Using Drama to Bring Language to Life Jul 26 2019

Everyday Editing Jan 30 2020 Editing is often seen as one item on a list of steps in the writing process?usually put somewhere near the end, and often completely crowded out of

writer's workshop. Too many times daily editing lessons happen in a vacuum, with no relationship to what students are writing. In *Everyday Editing*, Jeff Anderson asks teachers to reflect on what sort of message this approach sends to students. Does it tell them that editing and revision are meaningful parts of the writing process, or just a hunt for errors with a 50/50 chance of getting it right? comma or no comma? Instead of rehearsing errors and drilling students on what's wrong with a sentence, Jeff invites students to look carefully at their writing along with mentor texts, and to think about how punctuation, grammar, and style can be best used to hone and communicate meaning. Written in Jeff's characteristically witty style, this refreshing and practical guide offers an overview of his approach to editing within the writing workshop as well as ten detailed sets of lessons covering everything from apostrophes to serial commas. These lessons can be used throughout the year to replace Daily Oral Language or error-based editing strategies with a more effective method for improving student writing.

Boys and Writing Dec 31 2019 A look at how students' writing can be improved through a thinking skills agenda contains an emphasis on engaging boys with writing, but the techniques work equally well with girls and span a wide age and ability range.

Practical Web 2.0 Applications with PHP Aug 31 2022 In *Practical PHP Web 2.0 Applications*, PHP, MySQL, CSS, XHTML, and JavaScript/Ajax development techniques are brought together to show you how to create the hottest PHP web applications, from

planning and design up to final implementation, without going over unnecessary basics that will hold you back. This book includes must-have application features such as search functionality, maps, blogs, dynamic image galleries, and personalized user areas. It covers everything in a practical, tutorial style so you can start working on your own projects as quickly as possible.

SharePoint 2007 and Office Development Expert Solutions Sep 27 2019 Features end-to-end scenarios for using Office 2007 and SharePoint 2007, from generating Office documents programmatically to integrating document-based workflows with line of business applications or Web sites Takes an in-depth look at integrating the information worker products from Microsoft into broader solutions for the enterprise Some of the topics covered include building a workflow solution with Office and SharePoint 2007; programming SharePoint lists, items, and libraries; building Business Intelligence (BI) including Excel BI, Excel and Access Reporting, and SharePoint integration; using Web Content Management with SharePoint; and more

Computational Linguistics and Intelligent Text Processing Feb 10 2021 This book constitutes the refereed proceedings of the Third International Conference on Intelligent Text Processing and Computational Linguistics, CICLing 2002, held in Mexico City, Mexico in February 2002. The 44 revised papers presented together with four invited papers were carefully reviewed and selected from a total of 67 submissions. The papers are

organized in topical sections on semantics, word sense disambiguation, anaphora, syntax and parsing, part of speech tagging, lexicon and corpus, text generation, morphology, speech, spelling, information extraction and information retrieval, summarization, text mining, and text classification and categorization, document processing, and demo descriptions.

Beginning Joomla! Jun 04 2020 Joomla! is one of the most searched-for and hired-for open source content management systems in the world. Since 2007, the combination of Joomla! and Dan Rahmel's bestselling *Beginning Joomla!, From Novice to Professional* have made it so that all you have to do is read a single book to learn how to build sites that take community-authored content and turn it instantly into published web pages with features like rich templating, content management, forums, photo management, and article commenting. Now revised and updated for Joomla! 1.5, this second edition “job-in-a-book” provides the solid core of know-how that you'll need to get the most out of your Joomla! deployment, written to fully exploit the features of latest version of Joomla! More than just a simple “build a toy web site” guide, *Beginning Joomla!, Second Edition* will give you a wealth of life-saving tips, tricks, tools, and fixes that experienced Joomla! developers use to build powerful, popular web sites while avoiding major headaches. This book covers How to use add and create extensions Access management and how documents, photos, and other content are managed in Joomla! 1.5 E-commerce integration

and search engine optimization Dan Rahmel explores the updates to Joomla! 1.5 that you'll need if you already use Joomla! and explains, using the latest terms, how to build a web site from scratch if you don't already use Joomla! An update to the best-selling Joomla! title on the market, this is the Joomla! book to get.

Connecting Self-regulated Learning and Performance with Instruction Across High School Content Areas Nov 29 2019 This book shows how principles of self-regulated learning are being implemented in secondary classrooms. The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas. The book comprises 29 lesson plans in English language arts, natural and physical sciences, social studies, mathematics, foreign language, art, music, health, and physical education. Additionally, the chapters address students with special needs, technology, and homework. Each chapter begins with one or more lesson plans written by master teachers, followed by narratives explaining how the lesson plans were implemented. The chapters conclude with an analysis written by expert researchers of the self-regulated learning elements in the lessons. Each lesson and each analysis incorporate relevant educational standards for that area. Different types of high schools in several states serve as venues. This powerful new book edited by Maria K. DiBenedetto provides a unique and invaluable resource for both secondary teachers and researchers committed to supporting adolescents in the development of academic self-regulation. Each chapter is jointly written by teachers who provide a

wealth of materials, including lesson plans, and researchers who situate these lesson plans and academic self-regulation goals within the larger work on self-regulation. The topics covered are far broader than any other book I have seen in terms of developing academic self-regulation, covering over a dozen content areas, including literacy, mathematics, social studies, the sciences, and the arts. Teachers and scholars alike will find this book a must read. Karen Harris, EdD, Arizona State University A practical and magnificent blend of educational research and application. This book goes beyond presenting the findings of research on self regulation by connecting detailed strategies that align with the standards to the research. DiBenedetto et al. clearly illustrate how to develop self regulated learners in the classroom. A refreshing must read for all secondary educators and educational researchers seeking to be well grounded in education research and practical application techniques. Heather Brookman, PhD, Fusion Academy- Park Avenue Self-regulated learning is a research-based process by which teachers help students realize their own role in the learning process. Connecting Self-Regulated Learning and Performance with Instruction Across High School Content Areas consists of model teachers' lessons and analyses by prominent educational psychologists in the field of self-regulated learning. The book provides teachers with the tools needed to increase students' awareness of learning and inspires all educators to use self-regulated learning to promote engagement, motivation, and achievement in their students. The book also provides administrators with the principles

needed to infuse evidenced based self-regulated learning into their curriculum and instruction. I highly recommend the book! Marty Richburg, Northside High School
Designing for Networked Communications: Strategies and Development Apr 14 2021
Designing for Networked Communications: Strategies and Development explains how to plan, use, and understand the products and the dynamic social processes and tasks some of the most vital innovations in the knowledge society depend upon? social as well as technological. Focusing on various forms of design, implementation and integration of computer mediated communication, this book bridges the academic fields of computer science and communication studies. Designing for Networked Communications: Strategies and Development uses an interdisciplinary approach, and presents results from recent and important research in a variety of forms for networked communications. A constructive and critical view of the interplay between the new electronic and the more conventional modes of communication are utilized, while studies of organizational work practices demonstrate that the use of new technologies and media is best understood and integrated into work practices. In this process of merging, both are remodelled and rearranged while being adapted to the practices and activities for which they were designed.

Advances in Knowledge Discovery and Data Mining Aug 26 2019 This book constitutes the refereed proceedings of the 5th Pacific-Asia Conference on Knowledge Discovery and Data Mining, PAKDD 2001, held in Hong Kong, China in April 2001. The 38 revised full

papers and 22 short papers presented were carefully reviewed and selected from a total of 152 submissions. The book offers topical sections on Web mining, text mining, applications and tools, concept hierarchies, feature selection, interestingness, sequence mining, spatial and temporal mining, association mining, classification and rule induction, clustering, and advanced topics and new methods.

Joomla! Programming Dec 11 2020 When you master Joomla! programming, you can customize websites in ways that simply aren't possible by tweaking parameters or installing someone else's extensions. Now, there's an authoritative, "soup-to-nuts" programming guide for every Joomla! user: from beginners with no Joomla! development experience to long-time coders seeking a quick start with Joomla!'s powerful new versions, 1.6, 1.7, and 2.5. Joomla!™ Programming presents proven best practices for getting the job done right. Written by Mark Dexter and Joomla! design architect Louis Landry (who wrote much of the new Joomla! framework), the text is packed with detailed examples and sample code, in-depth reference-style explanations available nowhere else, and fascinating sidebars revealing why Joomla! works the way it does. Both a tutorial and reference, this title brings together step-by-step instructions for everything from simple tasks (such as template overrides) to cutting-edge techniques involving components, MVC, and the Joomla! framework. You'll learn how to View Joomla! from a programmer's perspective Extend Joomla! with layout overrides, plugins, and modules Take full advantage of Joomla!'s

improved new MVC implementation Build front-end and back-end components, from start to finish Secure your websites with Joomla!'s powerful, flexible new Access Control Lists Work with databases and use the new JDatabaseQuery to write complex queries Program Joomla! with JavaScript via the lightweight MooTools framework Develop custom category structures for your own websites and extensions Enable one-click updates for your own custom extensions Use the Joomla! platform as an application framework All example code, updates, and more information on Joomla! programming are available at the companion website, joomlaprogrammingbook.com.

The History of Mathematical Tables Oct 28 2019 The oldest known mathematical table was found in the ancient Sumerian city of Shuruppak in southern Iraq. Since then, tables have been an important feature of mathematical activity; table making and printed tabular matter are important precursors to modern computing and information processing. This book contains a series of articles summarising the technical, institutional and intellectual history of mathematical tables from earliest times until the late twentieth century. It covers mathematical tables (the most important computing aid for several hundred years until the 1960s), data tables (eg. Census tables), professional tables (eg. insurance tables), and spreadsheets - the most recent tabular innovation. The book is presented in a scholarly yet accessible way, making appropriate use of text boxes and illustrations. Each chapter has a frontispiece featuring a table along with a small illustration of the source where the table

was first displayed. Most chapters have sidebars telling a short "story" or history relating to the chapter. The aim of this edited volume is to capture the history of tables through eleven chapters written by subject specialists. The contributors describe the various information processing techniques and artefacts whose unifying concept is "the mathematical table".

The Hole in the Dike Nov 02 2022 Retells the tale of the little boy whose resourcefulness and courage saved his country from being destroyed by the ocean.

Readings in Groupware and Computer-Supported Cooperative Work Nov 09 2020 This comprehensive introduction to the field represents the best of the published literature on groupware and computer-supported cooperative work (CSCW). The papers were chosen for their breadth of coverage of the field, their clarity of expression and presentation, their excellence in terms of technical innovation or behavioral insight, their historical significance, and their utility as sources for further reading. Taken as a whole, the papers and their introductions are a complete sourcebook to the field. This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers. It should also serve as a valuable text for university courses on CSCW, groupware, and human-computer interaction.
