**The Cash Flow Solution** Oct 04 2022 Many nonprofits rely on conventional methods of making and managing money—from donations to cash reserves, endowments, and capital building campaigns—in hopes of securing financial stability for the future. Yet these acquired funds often remain tantalizingly out of reach for day-to-day operations; the balance sheet may look good, but the actual cash available is often surprisingly low. In order to achieve their missions, nonprofits need to fundamentally change the way they think about money. Richard and Anna Linzer introduce a groundbreaking approach to nonprofit financial management based on cash flow and the use of credit that gives nonprofits the money they need, when they need it while ensuring the long-term financial well-being of the organization. Their revolutionary and effective financial model is explained in clear and understandable terms for decision makers in both large and small nonprofit organizations. "The Linzers are revolutionaries in the nonprofit financial world and leaders should take notice!" --Martha J. Perry, associate executive director, McCune Foundation "A great book

for any board member of a nonprofit organization." --Michael Schlesinger, attorney, author, lecturer, and commentator in the field of taxation "Nonprofits now have a choice: Muddle along from crisis to crisis or follow the advice in this excellent, innovative book." --Irene Y. Namkung, past board president, the Western Arts Alliance, Northwest Folklife, and Oregon Potters' Guild "It's heresy, but it works. The Cash Flow Solution presents solid steps to financial sanity in the nonprofit boardroom." --James A. Kolb, West Sound Academy "From time to time a book makes so much sense you wonder why someone did not write it a long time ago. Richard and Anna Linzer's book "The Cash Flow Solution" is such a book. The principles are as fundamental and rock-solid as they are innovative. Applying their suggestions could help many troubled organizations survive and thrive. More importantly, the Linzers' insight could lead many nonprofits in coming closer to fulfilling their potential to deal with the many needs of our society." --Mike Pedretti, Artistic Director and President, Movement Theatre International

The second half of the book is more advanced and deals with the important role that "real options" (that is, as yet unexploited investment opportunities) play in the valuation of equity.

**Marketing High Profit Product/Service Solutions** Sep 22 2021 Marketing High Profit Product/Service Solutions addresses one of the most exciting and growing strategic marketing opportunities facing product and service companies - 'bundling'. Many customers want bundled products and services which represent integrated solutions to their problems, rather than buying individual products and services piecemeal, and if you become that supplier it can transform a company. There are many outstanding examples: Magna International grew in several stages from a supplier of basic individual auto parts to a company manufacturing a product/service 'super-bundle'; ultimately sourcing and assembling the entire car itself. GE developed their business involving the supply of medical imaging machines to hospitals to become a 'super-bundler' of complete hospital radiological floor imaging operations planning, installation, and integration. IBM

transformed their position as a supplier of individual hardware, software, and peripherals to companies into a product/service solution 'bundler' of increasing complexity, and finally into the 'super-bundle' of BPO (Business Process Outsourcing); representing an outsourced and complete integrated IT solution set for clients' entire global operations. Roger More explores what was learned by these leading companies (amongst others) when they transformed their market strategies to become bundlers of complex integrated customer solutions. Over many years the author has developed and tested new concepts, maps and tools for use by a wide variety of managers in developing strategies for these bundled product/service solutions. His book now offers these maps and tools to all who invest in a copy.

**Cash in on Cash Flow** Apr 17 2021 The cash flow business is creating a whole new

generation of success stories, and you can share in the wealth, whether you are looking for:  
A total career change  
A part-time source of income  
A work-from-home opportunity  
Supplemental retirement income  
Full-blown self-employment

People all across America are making thousands to tens of thousands of dollars per month in this red-hot new business that has already been discovered and reported on in *The Wall Street Journal* and elsewhere. It does not require any special financial education or occupational background, nor is it restricted by age, nationality, or gender. It is open to anyone willing to learn the simple three-step cash flow process that author Laurence J. Pino explains so clearly in *Cash In on Cash Flow*. Consider this: one out of every fifteen pieces of real estate sold in the United States involves an arrangement where a private individual takes back a note and receives payments long into the future. The sellers of eight out of ten businesses in the United States take payments over time. And consider lottery winners. After the initial excitement wears off and the reality sets in that lottery winnings will be spread over twenty years minus up-front taxes, the lottery winners realize that they've gotten too good at spending money before it comes in. What all of these people have in common is the fact that they are owed future payments but would prefer to receive an immediate lump sum of cash (even though it is smaller) rather than wait so long for these payments. The cash flow business deals with the buying and brokering of future payments just like these, from private individuals who want to trade mortgage notes, invoices, lottery winnings, car accident settlements, insurance

policies, and other assets for a lump sum of cash. That's where a cash flow specialist comes in, and that is what this book is all about -- how you can become a specialist and earn handsome income on a part-time or full-time basis. A pioneer in the cash flow business, Pino has perfected the system and written the first book on the subject. As a cash flow specialist, you will not be trying to sell products to friends, relatives, or neighbors. You don't have to "sign people up" to make money. And you don't have to make hefty capital investments. You can work when you want to, right from your home, according to your own lifestyle and income objectives. And the best news? You don't even need your own capital to get started. If you've got capital, you can invest in cash flows and earn incredible yields on your money. If you don't, you can still earn substantial fees brokering cash flows to people who do. Cash In on Cash Flow explains it all, simply and clearly.
