LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle Sep 18 2021 This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the divers effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability. This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

[Lives behind the Laws](#) Dec 10 2020 In this exploration of the administration of law and its role in the lives of ordinary people in the northern provinces of the Roman Empire, Serena Connolly draws upon a rich but little-known legal collection from the late 3rd century known as the Codex Hermogenianus. The codex is composed of imperial responses to petitions sent to Rome, written by a team of the emperor's legal experts. These petitions and responses provide a wealth of information about provincial legal administration and the lives of the non-elite petitioners. The man who prostituted his wife, the mother whose malicious son undersold her farm, and the slaves who posed as free men to get a loan are just a few of the lives to encounter. Lives behind the Laws makes a valuable contribution to Roman social, political, and legal history.

[The Instrument Manual](#) Aug 30 2022

Beyond Greek Oct 08 2020 Ancient Roman authors are firmly established in the Western canon, and yet the birth of Latin literature was far from inevitable. The cultural flourishing that eventually produced the Latin classics was one of the strangest events in history, as Denis Feeney demonstrates in this bold revision.

Mini-Lathe Aug 18 2021 The mini-lathe is a useful tool in the model engineer's workshop. With more choice than ever of more compact machines, a mini-lathe is able to accommodate a wide range of engineering requirements, projects and techniques, as well as being suitable for the novice engineer and for those with limited workshop space. Author and model engineer Neil Wyatt provides a practical guide to purchasing and using a mini-lathe, as well as examining more advanced techniques. The book includes a projects section to show the application of mini-lathe techniques. Topics covered include: choosing a mini-lathe; workshop safety and setting up the lathe; basic through to more advanced machining skills; modifications, additions and tuning of the mini-lathe. This essential reference source is aimed at the novice engineer, home metalworkers and for those with limited workshop space. Fully illustrated with 304 colour photographs.

[Creative Eloquence](#) Dec 30 2019 This is a study of the orations of the Roman statesman Cicero. Ingo Gildenhard does not treat them simply as models of eloquence, as previous critics have done, but as repositories for Cicero's most profound thinking on perennial questions as the ethics of happiness, the

notion of conscience, and the problem of divine justice.

[The Eternal Message](#) Sep 26 2019

Kill the Company Nov 01 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

Urban School Leadership May 03 2020 This important book, written by educational expert and urban school leader, Tom Payzant, offers a realistic understanding of what urban school leadership looks like from the inside. Payzant shares his first-hand knowledge of the unique managerial, instructional, and political tasks of this role. Effectively combining practical lessons and research, Urban School Leadership includes in-depth analysis of various leadership concerns. The book covers topics such as improving student achievement, working with unions, building community, and maintaining and developing resources. Most importantly, it offers stories of real school leaders whose successes and missteps reveal the inherent "messiness" of this difficult job. Urban School Leadership is part of the Jossey-Bass Leadership Library in Education series. "This important book provides compelling examples of how effective leaders can have hope, see progress, and achieve success for all children in the schools and districts they lead."—Richard Riley, former United States Secretary of Education "Tom Payzant is one of the few people who could provide such a comprehensive, useful book for educational leaders at all levels. This very practical book is grounded in the important experiences and impressive judgment of one of our nation's most successful school superintendents"—Jon Schnur, co-founder and CEO, New Leaders for New Schools "Tom Payzant is one of the finest urban educators of our generation. Urban School Leadership is compelling, crisp, and wise—providing a clear path for those dedicated to improving the trajectory of children's lives."—Timothy F.C. Knowles, executive director, Center for Urban School Improvement, University of Chicago "Urban School Leadership is a must read for anyone interested in the landscape of urban public education in America."—Beverly Hall, superintendent, Atlanta Public Schools

[The Psychology of Criminal and Antisocial Behavior](#) Jan 11 2021 The Psychology of Criminal and Antisocial Behavior: Victim and Offenders Perspectives is not just another formulaic book on forensic psychology. Rather, it opens up new areas of enquiry to busy practitioners and academics alike, exploring topics using a practical approach to social deviance that is underpinned by frontier research findings, policy, and international trends. From the relationship between psychopathology and crime, and the characteristics of catathymia, compulsive homicide, sadistic violence, and homicide victimology, to adult sexual grooming, domestic violence, and honor killings, experts in the field provide insight into the areas of homicide, violent crime, and sexual predation. In all, more than 20 internationally recognized experts in their fields explore

these and other topic, also including discussing youth offending, love scams, the psychology of hate, public threat assessment, querulence, stalking, arson, and cults. This edited work is an essential reference for academics and practitioners working in any capacity that intersects with offenders and victims of crime, public policy, and roles involving the assessment, mitigation, and investigation of criminal and antisocial behavior. It is particularly ideal for those working in criminology, psychology, law and law enforcement, public policy, and for social science students seeking to explore the nature and character of criminal social deviance. Includes twenty chapters across a diverse range of criminal and antisocial subject areas Authored by an international panel of experts in their respective fields that provide a multi-cultural perspective on the issues of crime and antisocial behavior Explores topics from both victim and offender perspectives Includes chapters covering research, practice, policy, mitigation, and prevention Provides an easy to read and consistent framework, making the text user-friendly as a ready-reference desktop guide

History and Silence Jul 29 2022 The ruling elite in ancient Rome sought to eradicate even the memory of their deceased opponents through a process now known as damnatio memoriae. These formal and traditional practices included removing the person's name and image from public monuments and inscriptions, making it illegal to speak of him, and forbidding funeral observances and mourning. Paradoxically, however, while these practices dishonored the person's memory, they did not destroy it. Indeed, a later turn of events could restore the offender not only to public favor but also to re-inclusion in the public record. This book examines the process of purge and rehabilitation of memory in the person of Virius Nicomachus Flavianus(?-394). Charles Hedrick describes how Flavian was condemned for participating in the rebellion against the Christian emperor Theodosius the Great—and then restored to the public record a generation later as members of the newly Christianized senatorial class sought to reconcile their pagan past and Christian present. By selectively remembering and forgetting the actions of Flavian, Hedrick asserts, the Roman elite honored their ancestors while participating in profound social, cultural, and religious change.

Randall McDaniel Dec 22 2021 A brief biography of the Minnesota Vikings offensive lineman.

Duck Says Don't! Jun 23 2019 Goose has gone on holiday and Duck is looking after her pond. But Duck is a bit too enthusiastic... "No splashing! No fishing! No racing!" he quacks. Soon Duck becomes very bossy and puts up signs everywhere! Diving is forbidden! (Because Duck says so)No swimming! (By order of Duck in charge of the pond!)But all his friends start leaving... will bossy Duck learn his lesson before it's too late? A fun-filled tale about what happens when someone gets a little too self-important!

Batteries in a Portable World Jun 27 2022

Women in Ancient Greece Jul 17 2021 Largely excluded from any public role, the women of ancient Greece nonetheless appear in various guises in the art and writing of the period, and in legal documents. These representations, in Sue Blundell's analysis, reveal a great deal about women's day-to-day experience as well as their legal and economic position - and how they were regarded by men.

Pathologies of Love in Classical Literature Jan 23 2022 Do you believe in love at first sight? The Greeks and the Romans certainly did. But far from enjoying this romantic moment carefree, they saw it as a cruel experience and an infection. Then what are the symptoms of falling in love? Are there any remedies? Any form of immunity? This book explores the conception of love (erôs) as a physical, emotional, and mental disease, a social-ethical disorder, and a literary unorthodoxy in Greek and Latin literature. Through illustrative case studies, the contributors to this volume examine two distinct, yet historically and poetically interrelated traditions of 'pathological love': lovesickness as/similar to disease and deviant sexuality described in nosologic terms. The chapters represent a wide range of genres (lyric poetry, philosophy, oratory, comedy, tragedy, elegy, satire, novel, and of course medical literature) and a fascinating synthesis of methodologies and approaches, including textual criticism, comparative philology, narratology, performance theory, and social history. The book closes with an anthology of Greek and Latin passages on pathological erôs. While primarily aimed at an academic readership, the book is accessible to anyone interested in Classics and/or the theme of love.

HOW TO CHEAT AT POKER - The MALLIANCE Jan 29 2020

A Student's Guide to International Relations Sep 06 2020 A concise journey through geopolitics and the

continuing debate about America's role in the world. Terrorist attacks, wars in Afghanistan and Iraq, the rise of China, and the decline of Europe have underscored the necessity of understanding the world around us. But how should we approach this crucial but often misunderstood topic? What do we need to know about the international order and America's role in it? A Student's Guide to International Relations provides a vital introduction to the geography, culture, and politics that make up the global environment. Angelo Codevilla, who has taught international relations at some of America's most prestigious universities, explains the history of the international system, the dominant schools of American statecraft, the instruments of power, contemporary geopolitics, and more. The content of international relations, he demonstrates, flows from the differences between our global village's peculiar neighborhoods. This witty and wise book helps make sense of a complex world.

Biological Oxidations Feb 21 2022

The Poverty of Corrupt Nations May 15 2021 Entrapment of the very poor is not an act of nature. Pillaging of natural resources is not an unfortunate accident. Policing that does not see crime, officials who do not enforce rules?not mistakes, either. Corruption is widespread, and the cost is high and debilitating to us all.

Psycholinguistics Sep 30 2022 A comprehensive introduction to psycholinguistic theory with activities, study questions, commentaries and key readings.

Mastering Embedded Linux Programming Nov 20 2021 Harness the power of Linux to create versatile and robust embedded solutions Key FeaturesLearn how to develop and configure robust embedded Linux devicesExplore the new features of Linux 5.4 and the Yocto Project 3.1 (Dunfell)Discover different ways to debug and profile your code in both user space and the Linux kernelBook Description If you're looking for a book that will demystify embedded Linux, then you've come to the right place. Mastering Embedded Linux Programming is a fully comprehensive guide that can serve both as means to learn new things or as a handy reference. The first few chapters of this book will break down the fundamental elements that underpin all embedded Linux projects: the toolchain, the bootloader, the kernel, and the root filesystem. After that, you will learn how to create each of these elements from scratch and automate the process using Buildroot and the Yocto Project. As you progress, the book will show you how to implement an effective storage strategy for flash memory chips and install updates to a device remotely once it's deployed. You'll also learn about the key aspects of writing code for embedded Linux, such as how to access hardware from apps, the implications of writing multi-threaded code, and techniques to manage memory in an efficient way. The final chapters demonstrate how to debug your code, whether it resides in apps or in the Linux kernel itself. You'll also cover the different tracers and profilers that are available for Linux so that you can quickly pinpoint any performance bottlenecks in your system. By the end of this Linux book, you'll be able to create efficient and secure embedded devices using Linux. What you will learnUse Buildroot and the Yocto Project to create embedded Linux systemsTroubleshoot BitBake build failures and streamline your Yocto development workflowUpdate IoT devices securely in the field using Mender or balenaPrototype peripheral additions by reading schematics, modifying device trees, soldering breakout boards, and probing pins with a logic analyzerInteract with hardware without having to write kernel device driversDivide your system up into services supervised by BusyBox runitDebug devices remotely using GDB and measure the performance of systems using tools such as perf, ftrace, eBPF, and CallgrindWho this book is for If you're a systems software engineer or system administrator who wants to learn how to implement Linux on embedded devices, then this book is for you. It's also aimed at embedded systems engineers accustomed to programming for low-power microcontrollers, who can use this book to help make the leap to high-speed systems on chips that can run Linux. Anyone who develops hardware that needs to run Linux will find something useful in this book - but before you get started, you'll need a solid grasp on POSIX standard, C programming, and shell scripting.

Junctionless Field-Effect Transistors Aug 06 2020 A comprehensive one-volume reference on current JLFET methods, techniques, and research Advancements in transistor technology have driven the modern smart-device revolution—many cell phones, watches, home appliances, and numerous other devices of everyday usage now surpass the performance of the room-filling supercomputers of the past. Electronic devices are continuing to become more mobile, powerful, and versatile in this era of internet-of-things (IoT)

due in large part to the scaling of metal-oxide semiconductor field-effect transistors (MOSFETs). Incessant scaling of the conventional MOSFETs to cater to consumer needs without incurring performance degradation requires costly and complex fabrication process owing to the presence of metallurgical junctions. Unlike conventional MOSFETs, junctionless field-effect transistors (JLFETs) contain no metallurgical junctions, so they are simpler to process and less costly to manufacture. JLFETs utilize a gated semiconductor film to control its resistance and the current flowing through it. Junctionless Field-Effect Transistors: Design, Modeling, and Simulation is an inclusive, one-stop reference on the study and research on JLFETs. This timely book covers the fundamental physics underlying JLFET operation, emerging architectures, modeling and simulation methods, comparative analyses of JLFET performance metrics, and several other interesting facts related to JLFETs. A calibrated simulation framework, including guidance on Sentaurus TCAD software, enables researchers to investigate JLFETs, develop new architectures, and improve performance. This valuable resource: Addresses the design and architecture challenges faced by JLFET as a replacement for MOSFET Examines various approaches for analytical and compact modeling of JLFETs in circuit design and simulation Explains how to use Technology Computer-Aided Design software (TCAD) to produce numerical simulations of JLFETs Suggests research directions and potential applications of JLFETs Junctionless Field-Effect Transistors: Design, Modeling, and Simulation is an essential resource for CMOS device design researchers and advanced students in the field of physics and semiconductor devices.

A Written Republic Mar 13 2021 In the 40s BCE, during his forced retirement from politics under Caesar's dictatorship, Cicero turned to philosophy, producing a massive and important body of work. As he was acutely aware, this was an unusual undertaking for a Roman statesman because Romans were often hostile to philosophy, perceiving it as foreign and incompatible with fulfilling one's duty as a citizen. How, then, are we to understand Cicero's decision to pursue philosophy in the context of the political, intellectual, and cultural life of the late Roman republic? In *A Written Republic*, Yelena Baraz takes up this question and makes the case that philosophy for Cicero was not a retreat from politics but a continuation of politics by other means, an alternative way of living a political life and serving the state under newly restricted conditions. Baraz examines the rhetorical battle that Cicero stages in his philosophical prefaces—a battle between the forces that would oppose or support his project. He presents his philosophy as intimately connected to the new political circumstances and his exclusion from politics. His goal—to benefit the state by providing new moral resources for the Roman elite—was traditional, even if his method of translating Greek philosophical knowledge into Latin and combining Greek sources with Roman heritage was unorthodox. *A Written Republic* provides a new perspective on Cicero's conception of his philosophical project while also adding to the broader picture of late-Roman political, intellectual, and cultural life.

The Grace Walk Experience May 27 2022 For years, Steve McVey's *Grace Walk* (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now *The Grace Walk Experience* workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

Nonlinear Distortion in Wireless Systems Apr 01 2020 This book covers the principles of modeling and simulation of nonlinear distortion in wireless communication systems with MATLAB simulations and techniques In this book, the author describes the principles of modeling and simulation of nonlinear distortion in single and multichannel wireless communication systems using both deterministic and stochastic signals. Models and simulation methods of nonlinear amplifiers explain in detail how to analyze and evaluate the performance of data communication links under nonlinear amplification. The book addresses the analysis of nonlinear systems with stochastic inputs and establishes the performance metrics

of communication systems with regard to nonlinearity. In addition, the author also discusses the problem of how to embed models of distortion in system-level simulators such as MATLAB and MATLAB Simulink and provides practical techniques that professionals can use on their own projects. Finally, the book explores simulation and programming issues and provides a comprehensive reference of simulation tools for nonlinearity in wireless communication systems. Key Features: Covers the theory, models and simulation tools needed for understanding nonlinearity and nonlinear distortion in wireless systems Presents simulation and modeling techniques for nonlinear distortion in wireless channels using MATLAB Uses random process theory to develop simulation tools for predicting nonlinear system performance with real-world wireless communication signals Focuses on simulation examples of real-world communication systems under nonlinearity Includes an accompanying website containing MATLAB code This book will be an invaluable reference for researchers, RF engineers, and communication system engineers working in the field. Graduate students and professors undertaking related courses will also find the book of interest.

Violence in Roman Egypt Feb 09 2021 What can we learn about the world of an ancient empire from the ways that people complain when they feel that they have been violated? What role did law play in people's lives? And what did they expect their government to do for them when they felt harmed and helpless? If ancient historians have frequently written about nonelite people as if they were undifferentiated and interchangeable, Ari Z. Bryen counters by drawing on one of our few sources of personal narratives from the Roman world: over a hundred papyrus petitions, submitted to local and imperial officials, in which individuals from the Egyptian countryside sought redress for acts of violence committed against them. By assembling these long-neglected materials (also translated as an appendix to the book) and putting them in conversation with contemporary perspectives from legal anthropology and social theory, Bryen shows how legal stories were used to work out relations of deference within local communities. Rather than a simple force of imperial power, an open legal system allowed petitioners to define their relationships with their local adversaries while contributing to the body of rules and expectations by which they would live in the future. In so doing, these Egyptian petitioners contributed to the creation of Roman imperial order more generally.

Adults in the Room Jul 25 2019 A Number One Sunday Times Bestseller What happens when you take on the establishment? In *Adults in the Room*, the renowned economist and former finance minister of Greece Yanis Varoufakis gives the full, blistering account of his momentous clash with the mightiest economic and political forces on earth. After being swept into power with the left-wing Syriza party, Varoufakis attempts to renegotiate Greece's relationship with the EU—and sparks a spectacular battle with global implications. Varoufakis's new position sends him ricocheting between mass demonstrations in Athens, closed-door negotiations in drab EU and IMF offices, and furtive meetings with power brokers in Washington, D.C. He consults and quarrels with Barack Obama, Emmanuel Macron, Christine Lagarde, the economists Larry Summers and Jeffrey Sachs, and others, as he struggles to resolve Greece's debt crisis without resorting to punishing austerity measures. But despite the mass support of the Greek people and the simple logic of Varoufakis's arguments, he succeeds only in provoking the fury of Europe's elite. Varoufakis's unvarnished memoir is an urgent warning that the economic policies once embraced by the EU and the White House have failed—and spawned authoritarianism, populist revolt, and instability throughout the Western world. *Adults in the Room* is an extraordinary tale of brinkmanship, hypocrisy, collusion, and betrayal that will shake the global establishment to its foundations.

The Epic Gaze Jul 05 2020 Re-envisioning epic from Homer to Nonnus through theories of the gaze.

Ontology-Based Multi-Agent Systems Mar 01 2020 During the last two decades, the idea of Semantic Web has received a great deal of attention. An extensive body of knowledge has emerged to describe technologies that seek to help us create and use aspects of the Semantic Web. Ontology and agent-based technologies are understood to be the two important technologies here. A large number of articles and a number of books exist to describe the use individually of the two technologies and the design of systems that use each of these technologies individually, but little focus has been given on how one can design systems that carry out integrated use of the two different technologies. In this book we describe ontology and agent-based systems individually, and highlight advantages of integration of the two different and complementary technologies. We also present a methodology that will guide us in the design of the -

egrated ontology-based multi-agent systems and illustrate this methodology on two use cases from the health and software engineering domain. This book is organized as follows: • Chapter I, Current issues and the need for ontologies and agents, describes existing problems associated with uncontrollable information overload and explains how ontologies and agent-based systems can help address these - sues. • Chapter II, Introduction to multi-agent systems, defines agents and their main characteristics and features including mobility, communications and collaboration between different agents. It also presents different types of agents on the basis of classifications done by different authors.

Power Hydraulics Oct 20 2021

The Persian Army 560-330 BC Oct 27 2019 The Persian Empire grew in the vacuum left by Assyria's destruction of the Kingdom of Elam (648 BC). Prince Teispes captured Anshan, once a stonghold of the Elamites. His father, Achaemenes is the person who is apparently responsible for training and organising the early Persian army and it is his name that is the beginning of the royal line of Achaemenian Kings. It is a dynasty which includes Darius the Great - the finest ruler of the Achaemenid era. The army he commanded included the infamous 'Immortals', who formed the elite of the Persian army, their numbers always kept to exactly 10,000 men.

Stesichorus Jun 15 2021 Stesichorus' lyric poetry vividly recreates the most dramatic episodes of Greek myth: the labours of Heracles, the sack of Troy, the vengeance of Orestes, and more besides. It can be appreciated today as never before, thanks to the recent discovery of ancient manuscripts buried for some

two millennia in the sands of Egypt. This fresh edition of Stesichorus' poems presents the first full-scale analysis of all his surviving works. The detailed introduction and commentary investigate a wide range of key issues, such as Stesichorus' imagery and style, his narrative technique, and his mythological innovations. The controversial question of how Stesichorus' poems were originally performed receives careful scrutiny; particular attention is paid to the fascinating story of the transmission, disappearance, and recovery of his work. A translation integrated with the commentary renders this book accessible to all readers with an interest in early Greek poetry and its legacy.

The Mandate of Heaven Nov 08 2020 For radicals in Europe and North America, the anti-imperialist—and Chinese—revolutions continued the great task of 1789, 1848, and 1870, the “bourgeois revolution” in Marx’s terms, and the creation of nations that would release the energies and unity of purpose to create new worlds of prosperity and freedom. The nationalist focus led to an emphasis on autarkic development—the nation, it was said, already possessed within its own boundaries all the requirements and resources to match the accomplishments of global civilization. The overthrow of empire in the 1950s and 1960s—of which the coming to power of the Chinese Communist party in 1949 was a important part—seemed to augur a new era in world history, one in which the majority of the world’s population secured liberation. There was perhaps a sense in which this was true, but the reality for the majority was far removed from this giddy hope. And in the case of the ordinary Chinese, the newly “liberated” regime proved far more brutal and exacting than those that it had replaced (which also attained high standards of brutality and injustice). In China the great famine of 1958–62 was only the most spectacularly cruel and gratuitous product of that new order. For the former inhabitants of the old empires, national liberation turned out to be not liberation of all, but the creation of a new national ruling class, as often as not exploiting its position at home to make fortunes then smuggled abroad.

Season of High Adventure Jun 03 2020 Recounts the life and career of the American journalist who lived in China from 1928 to 1941, got to know Mao and the other Communist leaders, and introduced them to the outside world in "Red Star over China"
