*Touring Cultures* Apr 09 2021 It is becoming ever clearer that while people tour cultures, cultures and objects themselves are in a constant state of migration. This collection brings together some of the most influential writers in the field to examine the complex connections between tourism and cultural change and the relevance of tourist experience to current theoretical debates on space, time and identity.

*I'm OK--You're OK* Nov 23 2019 Transactional Analysis delineates three observable ego-states (Parent, Adult, and Child) as the basis for the content and quality of interpersonal communication. "Happy childhood" notwithstanding, says Harris, most of us are living out the Not ok feelings of a defenseless child, dependent on ok others (parents) for stroking and caring. At some stage early in our lives we adopt a "position" about ourselves and others that determines how we feel about everything we do. And for a huge portion of the population, that position is "I'm Not OK -- You're OK." This negative "life position," shared by successful and unsuccessful people alike, contaminates our rational Adult capabilities, leaving us vulnerable to inappropriate emotional reactions of our Child and uncritically learned behavior programmed into our Parent. By exploring the structure of our personalities and understanding old decisions, Harris believes we can find the freedom to change our lives.

**Into the Wild** Dec 25 2019 Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

Effective Learning in Classrooms Mar 28 2020 `The book is at once accessible, evidence-based, practical and eminently readable...Readers will find in this book a treasury of learners' voices guiding us towards the goal of more effective learning in classrooms' - International Network for School Improvement `This book promotes an ambitious and inspiring conception of meaningful pedagogy and works to applaud those teachers who are determined to reflect upon, enquire into, and then facilitate "effective learning". A coherent and structured case is made for the primacy of "learning" over "work" - Learning & Teaching Update This book addresses an important, and too seldom addressed issue: learning. Not teaching, not performance, not "work": this book really is about learning, what makes learning effective and how it may be promoted in classrooms. The authors take the context of the classroom seriously, not only because of its effects on teachers and pupils, but because classrooms are notorious as contexts which change little. Rather than providing yet more tips, they offer real thinking and evidence based on what we know about how classrooms change. Four major dimensions of promoting effective learning in classrooms are examined in depth: Active Learning; Collaborative Learning; Learner-driven Learning and Learning about Learning. Evidence from practising teachers in the form of case studies and examples, and evidence from international research in the form of useful ideas and frameworks is included.

**I Feel You** Mar 20 2022 The author of *To the End of June* explains the purpose and practice of the transformative emotion while elucidating the myths, science, and power behind it. Empathy has become a gaping fault line in American culture. Pioneering programs aim to infuse our legal and educational systems with more empathic thinking, even as pundits argue over whether we should bother empathizing with our political opposites at all. Meanwhile, we are inundated with the buzzily termed "empathic marketing" —which may very well be a contradiction in terms. In *I Feel You*, Cris Beam carves through the noise with a revelatory exploration of how we perform empathy, how it is learned, what it can do—indeed, what empathy is in the first place. She takes us to the labs where the neural networks of compassion are being mapped, and the classrooms where children are being trained to see others' views. Beam visits courtrooms and prisons, asking how empathy might transform our justice system. She travels to places wracked by oppression and genocide, where reconciliation seems impossible, to report on efforts to heal society's deepest wounds through human connection. And finally, she turns to how we, as individuals, can foster compassion for ourselves. Brimming with the sensitive and nuanced storytelling that has made Beam one of our most respected journalists, *I Feel You* is an eye-opening affirmation of empathy's potential. "[Beam's] exceptional intelligence, equally evident in her thinking and her writing, shines light on empathy from extraordinary angles . . . Her clear goal is to empower readers with the knowledge to enact the complicated and varied forms of empathy necessary to navigate modern times." —Booklist, starred review

**Cochrane Handbook for Systematic Reviews of Interventions** Aug 01 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The

Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Widely considered to be the most important feminist novel of the past two decades, *I Love Dick* is still essential reading; as relevant, fierce and funny as ever.

**The Uninhabitable Earth** Jun 30 2020 #1 NEW YORK TIMES BESTSELLER • “The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon.”—Andrew Solomon, author of *The Noonday Demon* With a new afterword It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An “epoch-defining book” (*The Guardian*) and

“this generation’s Silent Spring” (The Washington Post), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s. Praise for *The Uninhabitable Earth* “The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, *The New York Times* “The book has potential to be this generation’s Silent Spring.”—*The Washington Post* “The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, *The New York Review of Books*

**Blood Relations** Sep 14 2021 The emergence of symbolic culture is generally linked with the development of the hunger-gatherer adaptation based on a sexual division of labor. This original and ingenious book presents a new theory of how this symbolic domain originated. Integrating perspectives of evolutionary biography and social anthropology within a Marxist framework, Chris Knight rejects the common assumption that human culture was a modified extension of primate behavior and argues instead that it was the product of an immense social, sexual, and political revolution initiated by women. Culture became established, says Knight, when evolving human females began to assert collective control over their own sexuality, refusing sex to all males except those who came to them with provisions. Women usually timed their ban on sexual relations with their periods of infertility while they were menstruating, and to the extent that their solidarity drew women together, these periods tended to occur in synchrony. The result was that every month with the onset of menstruation, sexual relations were ruptured in a collective, ritualistic way as the prelude to each successful hunting expedition. This ritual act was the means through which women motivated men not only to hunt but also to concentrate energies on bringing back the meat. Knight shows how this hypothesis sheds light on the roots of such cultural traditions as totemic rituals, incest and menstrual taboos, blood-sacrifice, and hunters’ atonement rites. Providing detailed ethnographic documentation, he also explains how Native American, Australian Aboriginal, and other magico-religious myths can be read as derivatives of the same symbolic logic.

*American Sniper* Oct 15 2021 The #1 *New York Times* bestselling memoir of U.S. Navy SEAL Chris Kyle, and the source for Clint Eastwood’s blockbuster, Academy-Award nominated movie. “An amazingly detailed account of fighting in Iraq—a humanizing, brave story that’s extremely readable.” —PATRICIA CORNWELL, *New York Times* Book Review “Jaw-dropping...Undeniably riveting.” —RICHARD ROEPER, *Chicago Sun-Times* From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him “The Legend”; meanwhile, the enemy feared him so much they named him al-Shaitan (“the devil”) and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well

as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

**The Sense of Hearing** Jun 11 2021 The Sense of Hearing is a truly accessible introduction to auditory perception that is intended for students approaching the subject for the first time, and as a foundation for more advanced study. The second edition has been thoroughly revised throughout, and included new chapters on music, hearing impairment, and a new appendix describing research methodologies. In clear and authoritative prose, the fundamental aspects of hearing are addressed.

The reader is introduced to the nature of sound and the spectrum, and the anatomy and physiology of the auditory system. Basic auditory processes including frequency selectivity, loudness and pitch perception, temporal resolution, and sound localization are explained. The reader is led to an understanding of the remarkable abilities of the auditory system in a systematic and coherent way. In subsequent chapters, it is shown how complex processes, such as perceptual organization, speech perception, and music perception, are dependent on the initial analysis that occurs when sounds enter the ear. Finally, a chapter on hearing impairment provides an introduction to disorders of the auditory system. The text benefits from 162 original illustrations, including uncluttered diagrams that illuminate auditory mechanisms. An extensive glossary provides definitions of technical terms. The emphasis is on explanation and clarity of style throughout, making *The Sense of Hearing* an essential resource for students and educators involved in this sometimes challenging field.
