*Innovative Staff Development in Healthcare* Aug 31 2022 This book explains how staff development is an important element for a sustainable staff structure health care facilities. At the end each chapter the reader finds a to-do-list, to replicate the project. The book is divided into 4 parts: 1. Practicing culture change, 2. Learning emotional intelligence, 3. Establishing interprofessional collaboration and 4. How to create the future of healthcare. Anticipating these options and experiences will help leaders to inspire their teams with practical ideas. To find the right trainings for staff development can be time consuming. With this overview about international successful projects the reader has an update about innovations in healthcare and uses the knowledge for the reader's own team or healthcare institution. This book helps readers experiencing their own culture change in their organisation, and create the future of their team or facility with knowledge about how to develop a person-centred culture, how to implement the TeamProcessPerformance in their operation theatre, how to reduce stress by using simple HeartMath-methods. This book also informs on how to establish wellbeing at the workplace, and how to practice interprofessional collaboration to reduce mistakes and costs. Written by authors from UK, Turkey, USA, Scotland, Ireland and Germany, this book offers human resource managers a look beyond their national horizon and presents innovative international concepts. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

**Staff-Less Libraries** Jun 28 2022 Staff-Less Libraries: Innovative Staff Design considers the challenges of this approach, its pros and cons, identifies international experiences, and discusses best practices. It presents a step-by-step approach to implementing a staffless library and/or services, and seeks to inspire professionals to share experiences and optimize their library. Staff-less public libraries, enabled by technological developments, represent a significant and innovative aspect of the development of public libraries. The concept radically enlarges the availability of user access to public libraries. Some Danish public library branches have, for example, increased their weekly opening hours from 20 to 80 hours per week. In Denmark, the concept has been quite successful, increasing the number of staff-less libraries from 81 public library units in 2011 to 260 in 2014. From a longer view, however, the staff-less library concept contributes to the modernization of public libraries by further opening the library. Many library professionals have been surprised by the near absence of vandalism through the staff-less opening hours. According to the latest trend, the staffless library model is gradually moving from thinly populated rural areas and suburban neighborhoods to urban contexts. This book explores the concept, hence furthering the debate. Presents and considers the idea of staff-less libraries using evidence-based data Considers the challenges, pros, and cons of the staff-less library

Identifies international experiences, best practices, and draws out a step-by-step approach to implementation
