brushing against your face and exciting your skin. See yourself looking down from low altitudes, soaking in the awesome beauty of some of the planet's most fascinating destinations. And now, imagine that you are sharing this incredible adventure with your spouse - all from a 2-seated lightweight gyroplane! Impossible? That's just what everyone used to think. But Andreas and Melanie Stuetz were on a mission to live out their childhood dreams - and nothing was going to stop them... What is a gyroplane? First flown successfully in 1923, gyroplanes are types of rotorcrafts. Rotorcrafts utilize self-turning rotors to develop lift and motor-powered propellers to generate thrust. Breathtaking and Courageous! With sheer wonderment, you'll glide into the atmosphere above historical Europe. In South America, you float above the stunning waterfalls of Iguacu. Across Africa, you experience a bird's-eye view of the captivating expanses of the Kalahari. Far away, you will

drift slowly over the sights of New Zealand while further developing your sense of amazement about the world we live in. About the Adventurers: Andreas G. Stuetz In the seventies, as a young boy in West Germany, Andreas dreamed of being an adventurer, an inventor and a successful entrepreneur. He always wanted to fly and was fascinated with the WDR cult TV puppet series Robbi, Tobbi and Fliewatuut. The Fliewatuut was a vehicle capable of flight, floatation and terrestrial travel. He was stricken then with need to fly. Life progressed. In 2000, he was awarded with the highly prestigious StartUp price by Angela Merkel. Andreas matured into the prosperous inventor and entrepreneur that he had envisioned - but something was missing. He still wanted to experience daring adventures in a Fliewatuut. Melanie Stuetz Like Andreas, Melanie dreamed as a child in East Germany, the GDR, of limitless travel, ideally as a cosmonaut in space. On October 1989 she and Andreas

father crossed as refugees the green border to Prague (CZ) to enter the first refugee trains, which lead to the Western Part of Germany, where her Mom already waited after her last visit without return. Twenty years later Melanie is closer than ever to her childhood dream. She was the first woman to pass the sport pilot licensing test for Xenon gyroplanes. After marrying, her and Andreas continued to plan for and train for the realization of their flight dreams. One day, while watching the James Bond movie, You Only Live Twice, they witnessed Sean Connery, as 007, performing a daring getaway scene. He soared away to safety, and to freedom, on a mini-helicopter - on a gyroplane! Let the adventure begin! Andreas and Melanie became licensed pilots and shortly thereafter launched their unified childhood dream of an unlimited world tour by the Fliewatuut-like gyroplane. It was a truly pioneering effort! Their astonishing adventure took eighteen months to complete and traversed five

separate continents. This amazing book and accompanying video collection are the thrilling results of more than 3 years of work overall. Charity Terre des Hommes is an international charity dedicated to helping disadvantaged children. Melanie and Andreas share a deep sense of gratitude for the fortune that they have enjoyed. For that reason, a percentage of all proceeds from the sales of the book and DVD's is donated to Terre des Hommes. But money alone is not enough. It is a dream that drives the life of a person. And that is the reason why Andy & Mel also asked the children about their dreams. It is important that children do have dreams to find their way in life. To make childhood dreams come true

Private, Sport, Commercial, and Flight Instructor certification. This is the version intended specifically for high-wing type airplanes. Each maneuver is depicted in detail according to type of aircraft in which the lesson will take place, states the objective of the task, and lists the practical test standards required. Fully illustrated with fold-out pages that show each maneuver complete on a large, one-page spread, allowing the reader to absorb all the visual and textual information together and all at once. Compact and easy to carry, with spiral binding for easy access to the fold-out pages. The illustrated fold-outs show each maneuver step-by-step, so pilots understand what they should be looking for outside the cockpit window. Contains full descriptions of stalls, slips, and ground reference maneuvers, as well as short, soft, and crosswind takeoffs and landings. Included are suggested checklists for everything from preflight to takeoffs and landings,

guides. ASA's Private Pilot Rotorcraft Practical Test Standards book includes both Section 1 (for Helicopter) and Section 2 (for Gyroplane). The PTS guide students, instructors, and FAA-designated examiners through checkrides. Every PTS details the skill and knowledge that must be demonstrated before

an examiner can issue a certificate or rating to an applicant. Written by the FAA, these books list the knowledge and experience prerequisites, the levels of skill that must be demonstrated before an examiner can issue a certificate or rating to an applicant, and describe background study and reference materials.
