The Book of Memory Dec 30 2019 The Book of Memory is a magisterial and beautifully illustrated account of the workings and function of memory in medieval society. Memory was the psychological faculty valued above all others in the period stretching from late antiquity through the Renaissance. The prominence given to memory has profound implications for the contemporary understanding of all creative activity, and the social role of literature and art. Drawing on a range of fascinating examples from Dante, Chaucer, and Aquinas to the symbolism of illuminated manuscripts, this unusually wide-ranging book offers new insights into the medieval world.

Dalloz, jurisprudence générale Apr 13 2021 *Jurisprudence générale du royaume, recueil périodique et critique de jurisprudence, de législation et de doctrine* *A Convergence of Civilizations* Nov 08 2020 Argues against the idea of a specific Islamic demography, and examines the spread of massive secularization throughout the Arab and Muslim world, suggesting that the evolution of Islam is not significantly different from the history of Christianity.

Atlas of Lebanon May 03 2020 After fifteen years of reconstruction in a relatively peaceful environment spanning the years 1990 to 2004, Lebanon has experienced successive violent political events resulting from complex entangled internal and external struggles. The Syrian crisis and its political, economic and demographic consequences on Lebanon have increased these tensions. This atlas sheds light on these new challenges and adds new data that complete the analyses already published in the Atlas du Liban. *Territoires et société (Atlas of Lebanon. Territories and Society)* released in 2007 by the same research team. Some of its components are included in this edition. Beyond the international regional crisis and the population movements, it takes into account Lebanon's socio-economic dimensions, the environmental issues linked to uncontrolled urbanization and to natural risks, as well as conflicts due to local territorial management. This atlas is the result of a collaborative endeavor between French and Lebanese researchers. It uses a geographical approach that puts in the foreground a spatial analysis of social and natural phenomena. Public sources are scarce in Lebanon, especially at the local scale. They are sometimes less reliable and difficult to access. It is particularly the case for the Lebanese census data, conversely data are abundantly available on the refugees population, which is less known than the population of refugees. International data help compare Lebanon to its neighbors. Thematic data produced by some ministries are helpful to provide a detailed view regarding specific domains. Analyses processed on aerial and satellite images have produced essential data on urbanization and environment. Local thematic fieldwork surveys have provided additional data. The book consists of seven chapters. The first one deals with the territorial state-building seen in the light of regional geopolitics, and emphasizes internal violence and the reemergence of militias and armed groups that fight each other and the state army. Lebanon is once again perceived as a territory divided between multiple allegiances. The second chapter is devoted to the analysis of population dynamics, despite the lack of reliable data whose sources are subject to discussion. It includes analyses of internal population flows, the Lebanese diaspora, and the assessment of Syrian refugees' influx. The third chapter shows the fragility of the Lebanese economic model. Its dependency on foreign investments and on...

Kill the Company Nov 01 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

Laurel Heights Oct 27 2019 Laurel Heights is a rich, character driven, story offering a glimpse into the lives of its four primary souls as they are confronted by the challenges of love, career, loyalty, honor, and a bevy of other considerations faced by each of us in every day life. Laurel Hawthorne and Drew Wayzata are the central characters, who discover their mutual capacity for love as well as their individual capacity for labor. Morgan Sheridan and Winntenalia Gardinado round out the cast with their shared bond for the secret organization one wants the other to become a member of to realize her heritage. Laurel Heights is sure to offend some and be greatly appreciated by others. Its author hopes you fall into the latter category. In any event, it cannot be denied that it is an extremely well written story. May you enjoy the read. If you do, please don't be shy about referring it to a friend!
