World Livestock 2011 Sep 07 2020 Although much has been said about livestock's role in achieving food security, in reality, the subject has been only partially addressed and no current document fully covers the topic. This report is an attempt to fill the gap. It expands the 2009 State of Food and Agriculture (SOFA) section which examined the multiple roles played by livestock in the food security of the poor and advocated for support of smallholders, both in responding to opportunities in livestock production and in finding other opportunities within a broad rural development strategy. Recognizing that food security is central to international development—and to the mandate of the Food and Agriculture Organization of the United Nation (FAO)—the report tells the story of livestock and food security from three perspectives.

The Classical Papers of A. E. Housman: Volume 2, 1897-1914 Mar 26 2022 A complete collection, in three volumes, of the classical articles and reviews of A. E. Housman. These papers were originally published between 1882 and 1936 in a variety of academic journals, many of which are now difficult to obtain. The editors have checked and, where necessary, supplemented and updated all the references and corrected errors in them, but have otherwise presented each paper, in full, with the minimum of editorial comment. At the end of Volume III there are very elaborate and comprehensive indexes of passages, words and topics discussed by Housman. The Kleine Schriften of great scholars are among the most important and useful tools of the classicist's trade. This edition will be of the first importance among such collections and will provide an essential work of reference. Housman's known virtues as a textual critic are decisively confirmed and emphasized now that his papers can be seen in one complete and connected sequence.

Mountains of Dough Aug 26 2019 Divorce isn't for the weak. The only thing flat about the mountainous ski resort in Winter Park, Colorado is Andie's empty wallet...that, and the burnt cookies she pulls out of the oven. Recently divorced from a mega wealthy attorney who stealthily bargained everything away from her, Andie is left with the Colorado hume, their huge, anxiety-ridden St. Bernard, Ralph, and her spoiled teenage daughter, Chelsea. Moving from the luxurious mansion in California to the Colorado log cabin has only made Chelsea more unpleasant. Because of his nervous tummy, even Ralph can barely hold in his dinner when Chelsea walks in the door. It's hard to convince your teen to still love her dog when he barfs every time she looks at him. But Andie's highest priority - aside from trying to help Chelsea find value in anything other than money - is to figure out how to make a living. And quickly, before she goes completely broke. The good news is Ralph's increased anxiety requires frequent visits to the local veterinarian, Dr. Rox, who takes Andie under her wing and invites her to the next book club meeting. Andie is thrilled to meet the diverse group - including Rusty, a sexy ski instructor who had helped her earlier in the week after Andie had crashed her car into a mountain to avoid mountain goats. Andie couldn't believe Rusty biked - BIKED - up to help her. Who bikes UP a mountain? With the help of her new friends, Andie faces the biggest challenges of her life: her daughter leaving her to go back and live her lousy ex, opening a bakery while still struggling with the high altitude glitches, and trusting a new man - who is a lot more athletic than Andie. Despite her good humor and the fact she is "forced" to sample a lot of cookies in her endeavors, she isn't sure she is as strong and independent as she thought. After all, how can she possibly climb out of debt if she can't even walk a block in these mountains without wheezing?

Lemon-Aid New Cars and Trucks 2012 Jun 28 2022 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

The Early Textual History of Lucretius' De Rerum Natura Jun 04 2020 This is the first detailed analysis of the fate of Lucretius' De rerum natura from its composition in the 50s BC to the creation of our earliest extant manuscripts during the Carolingian Age. Close investigation of the knowledge of Lucretius' poem among writers throughout the Roman and medieval world allows fresh insight into the work's readership and reception, and a clear assessment of the indirect tradition's value for editing the poem. The first extended analysis of the 170+ subject headings (capitula) that intersperse the text reveals the close engagement of its Roman readers. A fresh inspection and assignation of marginal hands in the poem's most important manuscript (the Oblongus) provides new evidence about the work of Carolingian correctors and offers the basis for a new Lucretian stemma codicum. Further clarification of the interrelationship of Lucretius' Renaissance manuscripts gives additional evidence of the poem's reception and circulation in fifteenth-century Italy.

The Big Reset Sep 27 2019 Amid the turmoil in the Eurozone, economic problems in Russia, stagnation in Japan, and rumblings that China may slip into recession, the one reliable asset is the American dollar. While it may encounter ups and downs, investors for decades have been confident that it will never lose a substantial part of its value. That may be about to change. In *The Big Reset*, Willem Middelkoop lays out the case for an inevitable monetary reset, one that will be designed to keep the United States in the driver's seat, but will include strong roles for the Euro and China's Renminbi—and, crucially, gold. This fully revised edition of Middelkoop's book takes into account developments since its original publication, which have only strengthened the case for the coming return of gold.

Bobath Concept Jul 06 2020 Authored by members of the British Bobath Tutors Association, *Bobath Concept: Theory and Clinical Practice in Neurological Rehabilitation* is a practical illustrated guide that offers a detailed exploration of the theoretical underpinning and clinical interventions of the Bobath Concept. The evolution of the Bobath concept is brilliantly captured in this volume. The recognition that the best inhibition may come from engaging the patient in normal activities is an example of the way one of the notions central to the original Bobath Concept has developed. In short, the Bobath Concept lies at the heart of an approach to neurorhabilitation that is ready to take advantage of the rapidly advancing understanding, coming from neuroscience, of brain function, in particular, of the effects of and responses to damage, and the factors that may drive recovery. It is no coincidence that neuroplasticity figures so prominently in the pages that follow.' Emeritus Professor Raymond Tallis BM BCH BA FRCP FMedSci LittD DLitt FRSA This book guides the reader through general principles to more specific application of neurophysiological principles and movement re-education in the recovery of important areas, including moving between sitting and standing, locomotion and recovery of upper limb function. *Bobath Concept: Theory and Clinical Practice in Neurological Rehabilitation* will be invaluable to undergraduate and qualified physiotherapists /occupational therapists and all professionals working in neurological rehabilitation. Covers the theoretical underpinning of the Bobath Concept. Presents a holistic, 24-hour approach to functional recovery. Focuses on efficient movement and motor learning, to maximise function. Forges links between theory and clinical practice. Illustrated throughout.
