Vuelta Jan 27 2022 The story of an uncovered voyage as colorful and momentous as any on record for the Age of Discovery--and of the Black mariner whose stunning accomplishment has been until now lost to history It began with a secret mission, no expenses spared. Spain, plotting to break Portugal's monopoly trade with the fabled Orient, set sail from a hidden Mexican port to cross the Pacific--and then, critically, to attempt the never-before-accomplished return, the vuelta. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with Pacific islanders, astonishing physical hardships--and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the Augustine friar mariner Andrés de Urdaneta, later caught up with Martín to achieve the vuelta as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez, through brilliant scholarship and riveting storytelling--including an astonishing outcome for the resilient Lope Martín--sets the record straight.

US Merchant Mariner's WW II Diary: a Small Window of Tens of Thousands Nov 24 2021 The WW II Diary of a US Merchant Mariner brings to light previously untold WW II sea action and the wartime experiences of a few seagoing men, their ships, and their voyages. The diary includes high-seas action, drama, and a bizarre event that needs to be told for posterity. The story opens another small door into the lives of the seamen whose stories had heretofore rested dormant and gathered dust. The men of the Merchant Marine and the Navy Armed Guard, who comprise a forgotten gray area, forged a strong chain, and proved an indispensable team in the course of WW II. The narration here gathers together personal significant events of maritime shipboard action, and will provide insight and resources for future generations concerning how the US fought the way to victory. Based upon the WW II wartime voyages of the merchant ships listed in the introduction, the story also relates the daily activities recorded within the ships' log books, several forms which were consulted for this book. A ship's secret log book is maintained by the ship's master, and subsequently is administered by the US Navy. The secret log, a wealth of information, contains voyage routes, ports of call, ship events, and records of longitude, latitude, and enemy action. In addition, the Naval Armed Guard commander also kept a daily log book of the armed guard service activities. And last, the official log book for ship activities and the merchant crew's welfare and affairs, was kept by the ship's chief mate. It was required by federal law and provided by the US Coast Guard. These and other records can be found shelved at the Naval District US Government Archived Files.
