*Artful Dodgers* Mar 10 2021 Who really knows how the art market works? Here, for the first time, art detective, veteran appraiser and international art expert Bernard Ewell opens the door and gives you a tour of the world's most unregulated market, one unlike any other which does not even follow the rules of modern economics. There are actually two art markets, with one operating as if it was the other, while both depend on The Six Myths That Drive The Art Market. Perception is everything and pervasive secrecy is the unbreakable rule. The players, the con men and the larger than life personalities are better than the characters created by novelists. You'll meet the crooks and their victims and realize that both are actually our creation. We all participate in the fraud and foolishness that props up an art market that buys and sells civilization's greatest treasures and most horrible junk. Be prepared to put aside everything you think you know and have heard from art dealers and read in the press. The international auction houses, the big name galleries, superstar artists, and the museums are haunted by fakes and forgeries which collectors usually buy for all the wrong

reasons. Arrogance or ignorance? It's both. The art market is where the intent to deceive meets contributory negligence and willful ignorance and most of those who have been defrauded don't even know it. This book will entertain you as it gives you the tools to more fully enjoy and safely buy art.

Female Chinese Bankers in the Asia Pacific Jun 01 2020 This book explores the simultaneous Asianisation and feminisation of mid-level management in the financial services sector in world and global cities in the Asia-Pacific. Chan draws on 50 in-depth interviews with ethnically Chinese female professionals working in middle or upper management positions in Sydney, Hong Kong, Shanghai and four other cities in Australia and China. She analyses the interplay between geographical location, gender and career mobility. Growing numbers of transnational Chinese live and work in major cities in developed countries. In this context, a new social, economic ecosystem is being created for and by female professionals working in an elite sector of the service industry across the Asia-Pacific region. Chan examines the nature of this ecosystem through an examination of the lives and work of such women – their role in forming multinational networks in financial service firms, their collective work situation, their daily challenges, and their coping strategies in the workplace and at home. A compelling comparative study, which will be of great interest to scholars and students looking at the role of gender and ethnicity in globalisation.
