Seeing Women, Strengthening Democracy Jan 28 2020 "How does the more equitable representation of women in positions of power affect male and female citizens? We argue that the election of women to political office-particularly where women's presence is highly visible to the public-strengthens the connections between women and the democratic process. For women, seeing more "people like me" in politics changes attitudes and orientations toward the democratic process. Substantial variation persists across the region in gender gaps in political engagement and political support. To assess the effects that women's officeholding has on these, we pair comparative survey data from Latin American countries with case study evidence from Uruguay. The Uruguayan case offers a unique laboratory for testing the impact of women's representation in elected positions of power on political engagement and support. Our panel survey of Uruguayan citizens reveals that the expected gender gaps in political knowledge, political interest, and other forms of political engagement were alive and well six weeks before the elections. Yet, just six weeks following the election-after the use of a gender quota had led to a doubling of women's representation in the Senate-those gender gaps had largely disappeared or had significantly waned. Our findings indicate that far-reaching gender gaps can be overcome by more equitable representation in our political institutions"--

[Still Life with Bread Crumbs - Behind the Story](#) Sep 04 2020 Anna Quindlen is a veteran in the writing profession, but venturing from New York Times sensation to sensational novelist was a big transition! Only a truly brilliant writer like herself could have accomplished it. Now a critically acclaimed author of multiple books, Quindlen is enjoying the liberties of story telling. In Still Life with Bread Crumbs, for example, she gets to explore and challenge both social standings and aging; she even makes sure the novel's dog gets a voice! Throughout the novel, she also reveals to readers the difficulties and insecurities of professional artists—what they experience, think about, and struggle with. Still Life with Bread Crumbs is charming and comical, but also quite thought provoking; it beautifully illustrates Quindlen's personality, writing style, and wit. It's a novel that's sure to put a smile on your face with every turn of the page and will induce in its readers an urgency to read it over and over again. Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

A Generous Community Oct 05 2020 Bishop Andy Doyle understands that the church must change. Every day, he presides over parishes that are no longer vital, that have not adapted to the "VUCA" (volatile, uncertain, complex, ambiguous) world of today -- the world in which the church exists. The church still looks to hierarchies when it needs to build networks, and stays mired in arguments when it needs to find unity. With the experience of a bishop and the insight of a deep learner, Doyle points the way to the future with a vision for how we can learn, serve, and communicate with each other. - Bishop of the Episcopal Diocese of Texas and author of *Unabashedly Episcopalian*; has the authority to call for change to hierarchical structures - Practical ideas for connecting and building communities of service

How Power Shapes Energy Transitions in Southeast Asia Jul 26 2022 An understanding of the role of energy-related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low-carbon development. Although renewable energy

sources have become technically feasible and economically viable, social and political factors continue to persist as the most critical obstacles for their dissemination. *How Power Shapes Energy Transitions in Southeast Asia* conceptualizes power for the field of sustainable energy governance. Based on empirical findings from the Philippines and Indonesia, the book develops an analytical approach that incorporates power theory into a multi-level governance framework. The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation. A power-based multi-level governance approach is introduced that is rooted in development thinking. Examining how coordination and power relations shape the development and dissemination of renewable energy technologies, the book also shows how decentralization affects low carbon development in emerging economies. Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries, this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation. *Report on the Activities of the Committee on the Judiciary of the United States Senate During the ... International Organizations and the Implementation of the Responsibility to Protect Apr 11 2021 This book seeks to understand the obligation of the international community to implement the principles of the Responsibility to Protect (R2P). With a focus on the humanitarian crisis in Syria, the volume examines what formal responsibility and actual capability international institutions have to protect and prevent civilians from systematic mass atrocities and presents an analysis of several prominent international organizations (IOs). Each chapter focuses on a specific organization and explores their formal responsibilities and how these pertain to the obligations of the R2P. Existing capabilities and actual abilities to address the challenges of R2P are analysed by looking at these issues before, during, and after the occurrence of the humanitarian crisis in Syria. With the UN not fully engaged in the Syrian conflict, the systematic human rights abuses have engendered greater attention on other organizations. This volume argues that if the UN Security Council's

inactions result in an abdication of responsibilities under the UN Charter, there should not only be a discussion of how the UN must alter its approach, but also an examination of whether there are alternative R2P paths for other MNOs to take in the name of international peace and human security. This book will be of much interest to students of R2P, humanitarian intervention, international organisations, Middle Eastern politics and security studies.

Don't Let Life Stop You from Living Oct 17 2021 Dont Let Life Stop You from Living springs from the personal experiences and insights of Georgette Elizabeth Correa, who found the books title flowing through her thoughts one day while sharing a heartfelt conversation with a friend. The phrase has worked on her, giving focus to her reflections on how to live fully and richly. As she notes in the Introduction, We somehow allow circumstances to defeat us: we stop trying; we stop dreaming; we just stop. Then, we do just enough to survive by doing what we must, not what we want. We even give up on love, happiness, and unfortunately on ourselves. Life can be hard at times, but it only

seems unbearable when you dont have a deeper understanding of who and what you are. Dont Let Life Stop You from Living notes the given things: each person has a life to live; life will throw challenges in ones path; changes are inevitable. What one does about these given truths is what makes ones life joyous or tragic. The choices one makes and the attitudes one adopts are the fruits of ones personal decisions. If you have the sense that, no matter what has happened to bring you to this point in your life, you stand in a spot where you can decide what will come next, then Dont Let Life Stop You from Living will encourage, embolden, and empower you to make those decisions and to live.

Fighting Terrorism Aug 15 2021 The war on terror, launched by the 9/11 terrorist attacks, has been waged inside as well as outside the U.S. borders. Perception of threat and efforts to ensure national security have led the United States to major reforms in its national

security policy, involving new military, security and legislative concepts. On the level of waging war outside the U.S. borders, the United States has introduced the system of Unmanned Aerial vehicles (UAVs), autonomous aircrafts without human pilot aboard, opening the possibility of highly effective computer game-like targeted killing. On the domestic level, new pieces of legislation and other antiterrorism measures have been raising privacy awareness and concerns whether the U.S. government keeps observing the Constitution. Nowadays, as advanced technology offers wide range of possibilities how to intrude one's privacy and effectively kill people, legal and ethical considerations have to catch up the reality. This work therefore seeks to elaborate on the statutory and constitutional framework of the current U.S surveillance measures as well as the limits of utilization of UAVs.
