Production Politics and Migrant Labour Regimes Nov 23 2021 This book emphasizes the importance of production politics, or struggles in the workplace between workers and their employers, for understanding migrant labour regimes in Asia and the Gulf. Drawing from a study of Bangladeshi construction workers in Singapore, as well as on comparative material in the region, Bal shows that migrant labour politics are significantly influenced by the specific form of production politics as well as their variable outcomes. In contrast to contentious politics approaches, this book sheds light on the extent to which migrant labour regimes can be contested by workers and civil society groups and explains the recent rise in migrant labour unrest in the region.

Modern Reading Practices and Collaboration Between Schools, Family, and Community Dec 01 2019 Language is one of the greatest predictors of personal, social, academic, and professional success. No one is born a reader; instead, learning to read is a process that requires time, effort, and availability. The only way for reading comprehension to develop is through practice: one learns to read by reading. As such, it is integral to acknowledge the importance of knowing how to read and facilitating this skill in schools and at home. Reading is a cornerstone for learning and no child will know academic success if their reading ability is compromised. Modern Reading Practices and Collaboration Between Schools, Family, and Community is a premier reference book that consolidates knowledge on reading competence. It presents the processes inherent in the act of reading and the mechanisms underlying the teaching and learning of reading, as well as all recent research in this area. Covering topics such as communication development, learning motivation, and transliteracy, this innovative title is an excellent resource for preservice teachers, childhood educators, educators of K-12 and higher education, academic libraries, teacher training lecturers, faculty and administration of K-12 and higher education, researchers, and academicians.

The author provides a thorough treatment of the topic and reveals the serious implications for the future of academia. Holy Communion in Contagious Times Aug 21 2021 Can the church celebrate the eucharist in “contagious times,” like the coronavirus pandemic, and if so, how? In this book, Richard Burrige investigates a wide range of proposed options, both in the everyday physical world (fasting the eucharist, spiritual communion, solo and concelebrated communions, lay presidency, drive-in and drive-thru eucharists, and extended communion) and in cyberspace (computer services for avatars, broadcast eucharists online, and narrowcast communions using webinar software like Zoom). Along the way, he tackles the whole range of concepts of the church, ordination, and the eucharist. This book is essential reading for anyone desiring an informed and provocative guide to the theology and practice of holy communion in our challenging times.

Essays on Essence and Existence Jun 26 2019 Essays on Existence and Essence presents a series of writings--including several previously unpublished--by Bob Hale on the topics of ontology and modality. The essays develop and consolidate a number of themes central to his work and to contemporary metaphysics, logic, and philosophy of language. They display Hale's innovative approach to some of the most fundamental issues in philosophy, in dialogue (and, in some cases, in collaboration) with other leading philosophers. The notion of a definition is examined as it applies both to words--verbal definitions--and to things--real definitions--and the relations between these are brought out in order to address problems in the metaphysics of necessity and the semantics and epistemology of modality. Hale argues for an essentialist theory of the source of necessity and our knowledge of it, and provides rigorous and inventive responses to problems such a theory might face. This theoretical framework is applied to the recently influential truthmaking approach to semantics and logic, developing an exact truthmaker account of universal quantification and modal statements. Other topics covered include the Fregean theory of ontological categories, the status of second-order logic, the metaphysics of numbers, and the nature of analytic propositions. The volume opens with a substantial introduction by Kit Fine, providing a critical examination of Hale's philosophy, and closes with a complete bibliography of Hale's writings.

The Yellow Wallpaper Illustrated Feb 24 2022 "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

China Turns to Multilateralism May 30 2022 China's recent rapid economic growth has drawn global attention to its foreign policy, which increasingly has had an impact on world politics. In contrast with China's long-standing preference for bilateralism or unilateralism in foreign policy, recent decades have seen changes in the PRC's attitude and in its declaratory and operational policies, with a trend toward the accepting and advocating of multilateralism in international affairs. Whilst China's involvement has been primarily in the economic arena, for example, participation in the World Trade Organization and ASEAN Plus Three, it has more recently expanded into international security institutions, such as the Shanghai Cooperation Organization. This book records, analyzes, and attempts to conceptualize, this phenomenal development in Chinese foreign policy and its impact on international relations, with the emphasis on China's active participation in multilaterally-oriented regional security regimes. Written by an impressive team of international scholars, this book is the first collective effort in the field of China studies and international relations to look at China's recent turn to multilateralism in foreign affairs. It will appeal to students and scholars of Chinese politics and foreign policy, security studies and international relations.
