engineering mechanics
review at mathalino Mar 19
2022 engineering mechanics is
divided into two major parts
namely statics and dynamics
statics is primarily concerned
to system of forces applied to
body at rest it includes the
following topics resultant of
force system equilibrium of
force system cables friction
trusses frames centroid center
of gravity and moment of
inertia
**introduction to engineering
mechanics coursera** Aug 24

2022 this course is an
introduction to learning and
applying the principles
required to solve engineering
mechanics problems concepts
will be applied in this course
from previous courses you have
taken in basic math and
physics the course addresses
the modeling and analysis of
static equilibrium problems
with an emphasis on real world
engineering
