History of Terrestrial Mammals in South America Jan 15 2021 This book takes a non-technical approach in covering the evolution of South American mammalian fauna throughout geological history, and discusses how South America has changed due to mammalian invasions. Unlike other works on the subject, this book attempts to answer several crucial questions that often go

unmentioned together in one cohesive monograph. What was the fauna like before the American interchange? What were the origins of the now-extinct groups when northern species arrived and out-competed them? How did the modern mammalian fauna come into being with such disparate animal groups? This information is given from a historical perspective throughout the book's 15 chapters, and is presented in an easily graspable fashion by mostly avoiding technical language. The book is written for academics, scientists and scholars engaged in paleontology, zoology and evolutionary biology, but may also appeal to a larger audience of general readers interested in mammalian evolution. The book begins with an introduction, describing the tools necessary to interpret the evolutionary history of South American mammals in geological terms and some of the early people who helped found South American mammalian paleontology. Chapter 2 describes the Mesozoic first mammals of Gondwana and what we are learning about them, dominant before the K/T extinction event. Then chapters 3 through 8 cover the Cenozoic, or "Age of Mammals", highlighting the major mammalian groups of South America that replaced the earlier mammals of Gondwana. These groups include the marsupials, native ungulates, the xenarthrans (armadillos, anteaters, sloths), the caviomorphs (rodents), and the platyrrhine monkeys. Chapters 9 and 10 address the Antarctic La Meseta fossils and the Colombian La Venta fossil faunal assemblages. Chapter 11 discusses the neotropical mammals that invaded the Caribbean Islands, and illustrates the influence South America has had on adjacent faunas. Chapter 12 describes the origin of the Amazon River and the role it has played in the evolution of the mammals and other flora and fauna. Chapter 13 tells the story of the Great American Biotic Interchange (GABI), and chapter 14 follows this up with a discussion of the Pleistocene mammal communities and their eventual extinction. Chapter 15 concludes the text by discussing the modern mammals of South America, and how despite the extensive Pleistocene extinctions there is still a lot of mammalian diversity in South America.

Speak It Louder Aug 29 2019 *Speak It Louder: Asian Americans Making Music* documents the variety of musics—from traditional Asian through jazz, classical, and pop—that have been created by Asian Americans. This book is not about "Asian American music" but rather about Asian Americans making music. This key distinction allows the author to track a wide range of musical genres. Wong covers an astonishing variety of music, ethnically as well as stylistically: Laotian song, Cambodian music drama, karaoke, Vietnamese pop, Japanese American taiko, Asian American hip hop, and panethnic Asian American improvisational music (encompassing jazz and avant-garde classical styles). In Wong's hands these diverse styles coalesce brilliantly around a coherent and consistent set of questions about what it means for Asian Americans to make music in environments of inter-ethnic contact, about the role of performativity in shaping social identities, and about the ways in which commercially and technologically mediated cultural production and reception transform individual perceptions of time, space, and society. *Speak It Louder: Asian Americans Making Music* encompasses ethnomusicology, oral history, Asian American studies, and cultural performance studies. It promises to set a new standard for writing in these fields, and will raise new questions for scholars to tackle for many years to come.

The Rise and Fall of American Growth Mar 29 2022 How America's high standard of living came to be and why future growth is under threat In the century after the Civil War, an economic revolution improved the American standard of living in ways previously unimaginable. Electric lighting, indoor plumbing, motor vehicles, air travel, and television transformed households and workplaces. But has that era of unprecedented growth come to an end? Weaving together a vivid narrative, historical anecdotes, and economic analysis, *The Rise and Fall of American Growth* challenges the view that economic growth will continue unabated, and demonstrates that the life-altering scale of innovations between 1870 and 1970 cannot be repeated. Robert Gordon contends that the nation's productivity growth will be further held back by the headwinds of rising inequality, stagnating education, an aging population, and the rising debt of college students and the federal government, and that we must find new solutions. A critical voice in the most pressing debates of our time, *The Rise and Fall of American Growth* is at once a tribute to a century of radical change and a harbinger of tougher times to come.

A Different Mirror for Young People Jun 07 2020 A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of A Different Mirror was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling A People's History of the United States for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into A Different Mirror for Young People. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, A Different Mirror for Young People brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's A People's History, Takaki's A Different Mirror offers a rich and rewarding "people's view" perspective on the American story.

Democracy in America Volume 1 Nov 24 2021 In the eleven years that separated the Declaration of the Independence of the United States from the completion of that act in the ordination of our written Constitution, the great minds of America were bent upon the study of the principles of government that were essential to the preservation of the liberties which had been won at great cost and with heroic labors and sacrifices. Their studies were conducted in view of the imperfections that experience had developed in the government of the Confederation, and they were, therefore, practical and thorough. -Introduction

Is Philosophy Dispensable? May 07 2020 "During 2005-2006 I continued my longstanding practice of writing occasional studies on philosophical topics, both for formal presentation and for informal discussion with colleagues. While my forays of this kind have usually been issued in journal publications, this has not been so in the present case so that the studies offered here encompass substantially new material. Notwithstanding their thematic variation, they manifest a uniformity of treatment and method in a way that is characteristic of my philosophical modus operandi and inherent in its endeavors to treat classical issues from novel points of view." --Nicholas Rescher Contents Preface Chapter 1: IS PHILOSOPHY DISPENSABLE? Harlan's Crops and Man Feb 02 2020 A scientific and historical study of crops and their age-old relationship with human civilization The cultivation and harvesting of crops have been at the heart of human culture and development for thousands of

years. As we have grown from hunter-gatherers into agrarian societies and industrial economies, our ongoing relationship with the plants that feed us and support our manufacturing has also evolved. So too, of course, have those plants themselves, with the combined forces of shifting climates, selective plant breeding, and genetic modification all working to alter their existence in profound and fascinating ways. Coming some 30 years after its previous incarnation, the third edition of Harlan's Crops and Man marks an exciting re-examination of this rich topic. Its chapters lay out the foundations of crop diversity as we know it, covering topics that range from taxonomy and domestication to the origins of agricultural practices and their possible futures. Highlights include: Archeological and anthropological studies of agriculture's history and development Detailed examinations of the histories and classifications of both crops and weeds Explanations of taxonomic systems, gene pools, and plant evolution Studies of specific crops by geographical region Updated to include the latest data and research available, this new edition of Harlan's Crops and Man offers an illuminating exploration of agricultural history to all those engaged with plant science and the cultivation of crops.

Land of Hope Apr 17 2021 For too long we've lacked a compact, inexpensive, authoritative, and compulsively readable book that offers American readers a clear, informative, and inspiring narrative account of their country. Such a fresh retelling of the American story is especially needed today, to shape and deepen young Americans' sense of the land they inhabit, help them to understand its roots and share in its memories, all the while equipping them for the privileges and responsibilities of citizenship in American society The existing texts simply fail to tell that story with energy and conviction. Too often they reflect a fragmented outlook that fails to convey to American readers the grand trajectory of their own history. This state of affairs cannot continue for long without producing serious consequences. A great nation needs and deserves a great and coherent narrative, as an expression of its own self-understanding and its aspirations; and it needs to be able to convey that narrative to its young effectively. Of course, it goes without saying that such a narrative cannot be a fairy tale of the past. It will not be convincing if it is not truthful. But as Land of Hope brilliantly shows, there is no contradiction between a truthful account of the American past and an inspiring one. Readers of Land of Hope will find both in its pages.

Citizen Power Aug 10 2020 As author of Citizen Power in 1971, Senator Mike Gravel determined that much of what he wrote then is apropos in America today; hence, the release of Citizen Power: A Mandate for Change that reflects the accuracy of his evaluation of problems then, his current position on a number of issues facing America now, and the process that Americans can undertake to become empowered as lawmakers in partnership with their elected officials. Most chapters of Citizen Power: A Mandate for Change present material from the original book, as well as new information and revised positions. The exceptions are Chapter 2: The National Initiative, and Chapter 7: The War on Drugs. All other chapters cover similar topics in both books, but with the senator's fresh insights for today's world. Each chapter ends with how the National Initiative, once enacted, could help solve the problems presented in that chapter. The Table of Contents is as follows: Chapter 1 Now It's the Citizen's Turn Chapter 2 The National Initiative Chapter 3 America's Failure in Education Chapter 4 Tax Reform The Fair Tax Chapter 5 The Health Security System Chapter 6 National Environmental & Energy Policy Chapter 7 The War on Drugs Chapter 8 Crime & Punishment Chapter 9 The Shroud of Secrecy Chapter 10 American Imperialism Chapter 11 Global Governance Chapter 12 Who Stole the American Dream?
