Batteries in the Nordics: Changing for Circularity Sep 18 2021 Available online: https://pub.norden.org/temanord2022-523/ The overall aim of this project is to promote the Nordic countries as a forerunner region in demanding and using sustainable design of batteries for consumer electronics and the transport sector, and to identify key opportunities, barriers and challenges in the transition towards a more sustainable use of battery technologies. The aesthetics of the design should meet with the overall sustainability: high quality, durability and smart assembly for refurbishing.The project is funded by the Nordic Working Group for Circular Economy (NCE) under the Nordic Council of Ministers. The project has been carried out by Viegand Maagøe A/S (Denmark) and IVL Swedish Environmental Research Institute (Sweden) in the period 20 October 2020 to 31 December 2021.A reference group with representatives from the Nordics has been established, who provided valuable input to the study.
Global Competitive Strategy May 27 2022 Globalization has fundamentally changed the game of business. Strategic frameworks developed for the analysis of purely domestic business necessarily fall short in the international business context. Managers and business students require alternative approaches to understand and cope with these far-reaching changes. We must learn to think globally in order to succeed. Global Competitive Strategy shows how we can do this by providing a unique set of strategic tools for international business. Such tools include the 'star analysis' that allows strategy makers to integrate geographic information with market information about the global business environment. Also introduced is the 'global value connection' that shows managers how to account for the gains from trade and the costs of trade. Aimed at MBA students taking courses in international strategy, consultants and practising managers with responsibility for strategic development, this 2007 book offers a comprehensive strategic framework for gaining competitive advantage in the global marketplace.
I Bytes Technology Industry Nov 20 2021 This document brings together a set of latest data points and publicly available information relevant for Technology Industry. We are very excited to share this content and believe that readers will benefit from this periodic publication immensely.
Neostrategic Management Jan 23 2022 ?Contemporary research in strategic management, with an emphasis on different tools and skills created by scholars in the field, is evident throughout Neostrategic Management. This book is specially designed to accommodate the needs of strategy students worldwide in our fast-changing twenty-first century. The authors integrate cutting-edge research on topics including corporate performance, governance, strategic leadership, technology and internationalization. Based on real-world practices and current research in the field, Neostrategic Management features an increased emphasis on the changing global economy and its role in strategic management.
Learn pfSense 2.4 Nov 01 2022 Install, Configure and Setup different connections with pfSense Key Features Build firewall and routing solutions with PfSense. Learn how to create captive portals, how to connect Pfsense to your https environment and so on. Practical approach towards building firewall solutions for your organization Book Description As computer networks become ubiquitous, it has become increasingly important to both secure and optimize our networks. pfSense, an open-source router/firewall, provides an easy, cost-effective way of achieving this – and this book explains how to install and configure pfSense in such a way that even a networking beginner can successfully deploy and use pfSense. This book begins by covering networking fundamentals, deployment scenarios, and hardware sizing guidelines, as well as how to install pfSense. The book then covers configuration of basic services such as DHCP, DNS, and captive portal and VLAN configuration. Careful consideration is given to the core firewall functionality of pfSense, and how to set up firewall rules and traffic shaping. Finally, the book covers the basics of VPNs, multi-WAN setups, routing and bridging, and how to perform diagnostics and troubleshooting on a network. What you will learn Install pfSense Configure additional interfaces, and enable and configure DHCP Understand Captive portal Understand firewalls and NAT, and traffic shaping Learn in detail about VPNs Understand Multi-WAN Learn about routing and bridging in detail Understand the basics of diagnostics and troubleshooting networks Who this book is for This book is towards any network security professionals who want to get introduced to the world of firewalls and network configurations using Pfsense. No knowledge of PfSense is required
Thank You Ibm! Next Edition Apr 01 2020 I began to write this book over twenty years ago. My purpose was to tell the true story about how IBM made too many companies successful by standing down rather than competing. As a Senior IBM Systems Engineer, I saw it all happen. The $ Trillion dollar PC marketplace is the biggest example of IBM's major losses. Yet, the PC was just one of many industry sub-segments over the years in which IBM failed miserably. We need more than ten fingers to count them all. This book tells all the great stories about how industries came into being and entrepreneurs often in their early twenties became billionaires. This book tells you which companies did the best; which regular guys became industry moguls; and who has the money today. Among other things, it tells us all who owes IBM the biggest thank you's. This book in many ways is about Big Blue's misgivings about being too successful in too many IT product areas. IBM Executives over the years from the CEO on down were all paid very well to manage all aspects of the company's business. Unfortunately each and every CEO after the Watsons and T. Vincent Learson, focused on just one aspect of IBM – its mainframe business. So the IBM Chieftains lost just about every other opportunity including the PC. They simply handed very crafty "entrepreneurs," the whole game. IBM created many industry billionaires simply by not watching its assets. Microsoft alone has four documented billionaires on its list which is topped by Bill Gates, the richest man in the world at $102 billion. Additionally, there are over 12,000 other Microsoft employees on the millionaire's list. IBM paid for all of the zillionaires. In Chapter 1, I show each and every billionaire and a number of millionaires. I then go on in sixty-nine chapters to tell you the essence of the full Microsoft / IBM story along with many other stories of IBM squandering many other real business opportunities. These are enjoyable to read but hard to believe. You are going to love this book, designed by an IBM insider and told with respect for IBM and with the truth that all of these great stories deserve. You will not want to put this book down. Kelly not only gives the facts about the new billionaires; he also provides a history lesson about the entire industry that will capture your imagination. You'll learn how all these billionaires got their money. The book begins with the introduction of the first computer and it takes you on a ride through all of the major events that occurred during each IBM CEO's tenure. The story thus begins with Thomas Watson Sr, as CEO and continues chapter by chapter to the state of the computer industry today. Kelly does it all in 69 easy-to-read enjoyable chapters. Few books are must-read but Thank You IBM! will quickly be at the top of your list and America's most read list.
Commemorative Issue to Celebrate the Life and Work of Prof. Roger W.H. Sargent Nov 08 2020 This book celebrates the life, work and influence of Professor Roger W.H. Sargent of Imperial College London. It does so through a range of original contributions that span the wide academic and industry interests of Professor Sargent. Roger Sargent passed away in late 2018, but his legacy lives on through his enormous academic tree, which traces to the early 1960s. That huge body of work has also had significant impacts on industrial practices. Roger was regarded as "the father of Process Systems Engineering (PSE)". This area of Chemical Engineering continues to influence the modelling, design, control, optimization and integrated performance of industrial and related processes. This book highlights some of those impacts and the ongoing importance of PSE in helping to solve some of the grand challenges of our time.
Personal Cybersecurity Aug 30 2022 Discover the most prevalent cyber threats against individual users of all kinds of computing devices. This book teaches you the defensive best practices and state-of-the-art tools available to you to repel each kind of threat. Personal Cybersecurity addresses the needs of individual users at work and at home. This book covers personal cybersecurity for all modes of personal computing whether on consumer-acquired or company-issued devices: desktop PCs, laptops, mobile devices, smart TVs, WiFi and Bluetooth peripherals, and IoT objects embedded with network-connected sensors. In all these modes, the frequency, intensity, and sophistication of cyberattacks that put individual users at risk are increasing in step with accelerating mutation rates of malware and cybercriminal delivery systems. Traditional anti-virus software and personal firewalls no longer suffice to guarantee personal security. Users who neglect to learn and adopt the new ways of protecting themselves in their work and private environments put themselves, their associates, and their companies at risk of inconvenience, violation, reputational damage, data corruption, data theft, system degradation, system destruction, financial harm, and criminal disaster. This book shows what actions to take to limit the harm and recover from the damage. Instead of laying down a code of "thou shalt not" rules that admit of too many exceptions and contingencies to be of much practical use, cloud expert Marvin Waschke equips you with the battlefield intelligence, strategic understanding, survival training, and proven tools you need to intelligently assess the security threats in your environment and most effectively secure yourself from attacks. Through instructive examples and scenarios, the author shows you how to adapt and apply best practices to your own particular circumstances, how to automate and routinize your personal cybersecurity, how to recognize security breaches and act swiftly to seal them, and how to recover losses and restore functionality when attacks succeed. What You'll Learn Discover how computer security works and what it can protect us from See how a typical hacker attack works Evaluate computer security threats to the individual user and corporate systems Identify the critical vulnerabilities of a computer connected to the Internet Manage your computer to reduce vulnerabilities to yourself and your employer Discover how the adoption of newer forms of biometric authentication affects you Stop your router and other online devices from being co-opted into disruptive denial of service attacks Who This Book Is For Proficient and technically knowledgeable computer users who are anxious about cybercrime and want to understand the technology behind both attack and defense but do not want to go so far as to become security experts. Some of this audience will be purely home users, but many will be executives, technical managers, developers, and members of IT departments who need to adopt personal practices for their own safety and the protection of corporate systems. Many will want to impart good cybersecurity practices to their colleagues. IT departments tasked with indoctrinating their users with good safety practices may use the book as training material.
Owning the Olympics Jul 29 2022 "From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the "New China"--A global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, Owning the Olympics reveals how multiple entities-including the Chinese Communist Party itself-seek to influence and control the narratives through which the Beijing Games will be understood"--Publisher's description.
Paper Tigers, Hidden Dragons Feb 21 2022 China presents us with a conundrum. How has a developing country with a spectacularly inefficient financial system, coupled with asset-destroying state-owned firms, managed to create a number of vibrant high-tech firms? China's domestic financial system fails most private firms by neglecting to give them sufficient support to pursue technological upgrading, even while smothering state-favoured firms by providing them with too much support. Due to their foreign financing, multinational corporations suffer from neither insufficient funds nor soft budget constraints, but they are insufficiently committed to China's development. Hybrid firms that combine ethnic Chinese management and foreign financing are the hidden dragons driving China's technological development. They avoid the maladies of China's domestic financial system while remaining committed to enhancing China's domestic technological capabilities. In sad contrast, China's domestic firms are technological paper tigers. State efforts to build local innovation clusters and create national champions have not managed to transform these firms into drivers of technological development. These findings upend fundamental debates about China's political economy. Rather than a choice between state capitalism and building domestic market institutions, China has fostered state capitalism even while tolerating the importing of foreign market institutions. While the book's findings suggest that China's state and domestic market institutions are ineffective, the hybrids promise an alternative way to avoid the middle-income trap. By documenting how variation in China's institutional terrain impacts technological development, the book also provides much needed nuance to widespread yet mutually irreconcilable claims that China is either an emerging innovation power or a technological backwater. Looking beyond China, hybrid-led development has implications for new alternative economic development models and new ways to conceptualize contemporary capitalism that go beyond current domestic institution-centric approaches.

Intelligent Computing Aug 25 2019 This book presents the proceedings of the Computing Conference 2019, providing a comprehensive collection of chapters focusing on core areas of computing and their real-world applications. Computing is an extremely broad discipline, encompassing a range of specialized fields, each focusing on particular areas of technology and types of application, and the conference offered pioneering researchers, scientists, industrial engineers, and students from around the globe a platform to share new ideas and development experiences. Providing state-of-the-art intelligent methods and techniques for solving real- world problems, the book inspires further research and technological advances in this important area.
The Inside Story of China's High-tech Industry Nov 28 2019 In the 1980s, China faced the monumental task of creating, from scratch, internationally competitive companies. This challenge was especially daunting in the information and communications technology sector. The Inside Story of China's High-Tech Industry describes the emergence and growth of this industry through an analysis of China's leading science park, Beijing's Zhongguancun. Zhou argues that, in the case of China, it is the conjunction of export and domestic markets that has provided the main impetus to technological learning and the development of industry competitiveness. This is the best treatment to date of China's most important innovation region.
Business Trends in the Digital Era Jan 29 2020 This book introduces 10 mega business trends, ranging from big data to the O2O model. By mining and analyzing mountains of data, the author identifies these 10 emerging trends and goes to great lengths to explain and support his views with up-to-date cases. By incorporating the latest developments, this book enables readers to keep abreast of rapidly advancing digital technologies and business models. In this time of mass entrepreneurship and innovation, acquiring deep insights into business trends and grasping opportunities for innovation give readers (business executives in particular) and their companies a competitive advantage and the potential to become the next success story. The Chinese version of the book has become a hit, with some business schools using it as a textbook for their S&T Innovation and Business Trends programs. It also provides business executives with a practical guide for their investment and operation decisions.
c't TESTGUIDE (2015) Sep 26 2019 Auf über 280 Seiten sind im "c't TESTGUIDE" die wichtigsten Tests der c't-Redaktion des Jahres versammelt. Die insgesamt mehrere Hundert Einzel- und Vergleichstests in bewährter gründlicher c't-Qualität sind in acht Sparten unterteilt: - "Mobile" mit Smartphone-Vergleichen, Outdoor-Androids,

kabellose Ladegeräte und natürlich Smartwatches: Was taugen die intelligenten Uhren wirklich? - In der Notebook- und Tablet-Sparte finden Sie Tests von kleinen bis großen Laptops, von Hybrid-Notebooks und von Tablets unterschiedlicher Preisklassen. - In "PC und Zubehör" finden Sie einen Mini-PC-Vergleich, Tests von Büro-Komplett-PCs und All-in-One-PCs bis 24 Zoll, sowie Prüfstände von Prozessoren und Mainboards - von Highend-Gaming über Grafikarten für Kompaktrechner bis zu Spielen in 4K-Auflösung reicht das Spektrum bei Grafikkarten. Highlight: 60 Grafikkarten im Vergleich - Speicherplatz braucht jeder: Sie haben die Wahl aus Tests von SSD und Festplatten, NAS-Gehäuse, USB-Boxen und Robuste externe HDDs - Monitore: Große 21:9-Monitore, darunter plane und gekrümmte, Hochauflösende Displays und natürlich 4K-Monitore - Zudem haben wir getestet: preiswerte Tintendrucker, Laser-Farbdrucker fürs Büro und A3-Fotodrucker - Auch Netzwerk-Tests finden Sie im E-Book: Gigabit-Powerline-Adapter, Fritzbox und andere Router, sowie Überwachungskameras

Fundamentals of Engineering Economic Analysis Mar 25 2022 Fundamentals of Engineering Economic Analysis offers a powerful, visually-rich approach to the subject—delivering streamlined yet rigorous coverage of the use of economic analysis techniques in engineering design. This award-winning textbook provides an impressive array of pedagogical tools to maximize student engagement and comprehension, including learning objectives, key term definitions, comprehensive case studies, classroom discussion questions, and challenging practice problems. Clear, topically—organized chapters guide students from fundamental concepts of borrowing, lending, investing, and time value of money, to more complex topics such as capitalized and future worth, external rate of return, deprecation, and after-tax economic analysis. This fully-updated second edition features substantial new and revised content that has been thoroughly re-designed to support different learning and teaching styles. Numerous real-world vignettes demonstrate how students will use economics as practicing engineers, while plentiful illustrations, such as cash flow diagrams, reinforce student understanding of underlying concepts. Extensive digital resources now provide an immersive interactive learning environment, enabling students to use integrated tools such as Excel. The addition of the WileyPLUS platform provides tutorials, videos, animations, a complete library of Excel video lessons, and much more.

EBOOK: Marketing Management Dec 30 2019 Marketing Management: A Contemporary Perspective provides a fresh new perspective on marketing from some of the leading researchers in Europe. The book offers students and practitioners the comprehensive coverage they need to make the right decisions to create and implement highly successful marketing strategies. This exciting new edition includes updated cases and combines scholarly international research with relevant and contemporary examples from markets and brands across the world. The authors combine their experience as researchers and industry consultants to provide the conceptual and theoretical underpinning of marketing and empirical research, helping students to understand how marketing concepts can be applied and implemented. The book covers a full range of industries including business-to-customer, business-to-business, services marketing, retailing and international marketing from companies around the globe.

E-Commerce Strategy Sep 30 2022 E-Commerce Strategy builds awareness and sharpens readers' understanding of the key issues about e-commerce strategies. To link theory of e-commerce strategy with practice in the real world, it brings together theoretical perspectives based on academic research, integrated use of technologies and large amount of cases, especially those of China. With regard to the innovative technical standards and frameworks, it proposes strategic analysis from a technical point of view. The book is intended for postgraduate students in e-commerce and computer science as well as government officials, entrepreneurs and managers. Prof. Zheng Qin is the Director of Software Engineering and Management Research Institute, Tsinghua University, China; Dr. Shundong Li is a Professor at the School of Computer Science, Shaanxi Normal University, China; Dr. Yang Chang and Dr. Fengxiang Li are both Research Assistants at the School of Software, Tsinghua University, China.

Mergers, Acquisitions, and Other Restructuring Activities Oct 27 2019 Explaining the real-world of mergers, acquisitions, and restructuring based on his own academic knowledge and experience, Donald DePamphilis shows how deals are done, rather than just explaining the theory behind them.

Get Your Business Funded Jul 05 2020 Explore the many options available to get the money you need for your business Whether your business is a new start-up, an established company attempting to grow, or somewhere in between, Get Your Business Funded gives you the full range of options for raising capital in today's challenging economy. Covering everything from bank loans to angel investors to equity financing to more unorthodox methods, this complete guide uses clear, easy-to-understand language to explain each approach. Divided into two sections: "Sources and Funding" and "What You Need to Know" Explains such unorthodox financing sources as peer-to-peer lending, online grants, business plan competitions, and the "friends and family plan" Reveals untapped funding streams available through the government Follows on the success of the author's previous work The Small Business Bible Pick up this reader-friendly guide and discover the many ways you can Get Your Business Funded right now.

Licensing Royalty Rates, 2020 Edition (IL) Feb 09 2021 This valuable reference presents the "going" royalty rate for virtually any product, including over 1,500 products and services in ten lucrative categories--art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit and music. The essential reference for both beginning and more experienced licensing professionals. Knowing the "going" royalty rate for virtually any product is as simple as reaching for the newly published Licensing Royalty Rates, 2020 Edition . Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing Royalty Rates, 2020 Edition provides all the information you need to calculate the right rate every time. The data in Licensing Royalty Rates is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue-ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data: Royalty rate listing alphabetically by licensed product --provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class--lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services--offers a quick-reference to products with a high potential for licensing. Comprehensive list of licensed products and services--presents a detailed list of all surveyed products and services within a trademark class for preparing intent-to-use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market and the parameters of the specific deal itself. Previous Edition: Licensing Royalty Rates, 2019 Edition, ISBN 9781543800425

The Pictures Are Gone! Dec 10 2020 Here is a story about a brave football... However, all the pictures are gone. None on the cover, and none here on the back. Except my picture... but who really wants to know what the author looks like? Can you figure out why the pictures are gone?

Marketing High Profit Product/Service Solutions Aug 18 2021 Marketing High Profit Product/Service Solutions addresses one of the most exciting and growing strategic marketing opportunities facing product and service companies - 'bundling'. Many customers want bundled products and services which represent integrated solutions to their problems, rather than buying individual products and services piecemeal, and if you become that supplier it can transform a company. There are many outstanding examples: Magna International grew in several stages from a supplier of basic individual auto parts to a company manufacturing a product/service 'super-bundle'; ultimately sourcing and assembling the entire car itself. GE developed their business involving the supply of medical imaging machines to hospitals to become a 'super-bundler' of complete hospital radiological floor imaging operations planning, installation, and integration. IBM transformed their position as a supplier of individual hardware, software, and peripherals to companies into a product/service solution 'bundler' of increasing complexity, and finally into the 'super-bundle' of BPO (Business Process Outsourcing); representing an outsourced and complete integrated IT solution set for clients' entire global operations. Roger More explores what was learned by these leading companies (amongst others) when they transformed their market strategies to become bundlers of complex integrated customer solutions. Over many years the author has developed and tested new concepts, maps and tools for use by a wide variety of managers in developing strategies for these bundled product/service solutions. His book now offers these maps and tools to all who invest in a copy.

Radical Product Thinking Jun 15 2021 Iteration rules product development, but it isn't enough to produce dramatic results. This book champions Radical Product Thinking, a systematic methodology for building visionary, game-changing products. In the last decade, we've learned to harness the power of iteration to innovate faster—we've invested in a fast car, but our ability to set a clear destination and navigate to it hasn't kept up. When we iterate without a clear vision or strategy, our products become bloated, fragmented, and driven by irrelevant metrics. They catch "product diseases" that often kill innovation. Radical Product Thinking (RPT) gives organizations a repeatable model for building world-changing products. The key? Being vision-driven instead of iteration-led. R. Dutt guides readers through the five elements of the methodology (vision, strategy, prioritization, execution and measurement, and culture) to develop a clear process for translating vision into reality, and turning RPT skills into muscle memory. This book offers refreshing solutions to the shortcomings of our current model for product development; be prepared to toss out everything you know about a good vision and learn how to measure progress to create revolutionary products. The best part? You don't have to be a natural-born visionary to produce extraordinary results.

National Solutions to Trans-Border Problems? Mar 13 2021 'Triggered by the North American Free Trade Agreement (NAFTA), Canada, the United States and Mexico redefined their public policies to facilitate the regionalization of transactions. However, this volume addresses the institutional gaps that still remain focusing mainly on the cross-border governance of security aspects. It gathers interdisciplinary contributions of specialists working on continental issues within Canada, the United States and Mexico and highlights the transnational dimension of certain issues still managed under national-framed policies. Furthermore, it explores the possibilities and constraints for moving public policy into new cross-border governance strategies. Divided in three parts, the first part assesses what is at stake in cross-border governance issues and whether the integrative trend in the region will be maintained or stalled in the years to come. The second part explores the growing scope of security problems interconnected with borders, migration, energy and drug trafficking across the region. It highlights how Mexico and Canada are responding or adapting their policy choices to a continental security approach framed by the US after the terrorist attacks of September 11, and to the major concerns of the Obama administration. The third part focuses on the governance of territorial borders and bilateral affairs, i.e. Mexico-US and Canada-Mexico relations.

Three Cities Jul 25 2019 Orthodox is obsolete; conventional is kaput. We thought we knew how we make economics, politics, technology and nature work for us. But increasingly, they are failing to run by the rules and systems we've honed over recent decades. Boom-bust economies, fractured and destructive politics and a deeply degraded ecosystem are just some of the symptoms. Pioneers around the world are seeking new values, systems and technologies. Thus equipped we might achieve the unprecedented, speed, scale and complexity of change we need to meet the immense challenges of the twenty-first century. In this BWB Text acclaimed business journalist Rod Oram travels to Beijing, London and Chicago to meet some of these pioneers and report on their setbacks and progress. Because if 10 billion people are going to live well on this planet in 2050, we're going to have to fundamentally change the way we do things.
