The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

[Mercury Fate and Transport in the Global Atmosphere](#) Dec 23 2021 Mercury, primarily because of its existence and bioaccumulation as methylmercury in aquatic organisms, is a concern for the health of higher trophic level organisms, or to their consumers. This is the major factor driving current research in mercury globally and in environmental regulation, and is the driver for the current UNEP Global Partnership for Mercury Transport and Fate Research (UNEP F&T) initiative. The overall focus of the UNEP F&T report is to assess the relative importance of different processes/mechanisms affecting the transfer of mercury (Hg) from emission sources to aquatic and terrestrial receptors and provide possible source-receptor relationships. This transfer occurs through atmospheric transport, chemical transformations and subsequent deposition, and involves the intermittent recycling between reservoirs that occurs prior to ultimate removal of Hg from the atmosphere. Understanding the sources, the global Hg transport and fate, and the impact of human activity on the biosphere, requires improved knowledge of Hg movement and transformation in the atmosphere. An improved understanding of Hg emission sources, fate and transport is important if there is to be a focused and concerted effort to set priorities and goals for Hg emission management and reduction at the national, regional and global levels; and to develop and implement such policies and strategies. To achieve this, a series of coordinated scientific endeavors focused on the estimation of sources, measurement and validation of concentrations and processes, and modeling, coupled with interpretation of the results within a policy framework, is likely to be required.

The Water Footprint Assessment Manual Mar 02 2020 People use lots of water for drinking, cooking and washing, but significantly more for producing things such as food, paper and cotton clothes. The water footprint is an indicator of water use that looks at both direct and indirect water use of a consumer or producer. Indirect use refers to the 'virtual water' embedded in tradable goods and commodities, such as cereals, sugar or cotton. The water footprint of an individual, community or business is defined as the total volume of freshwater that is used to produce the goods and services consumed by the individual or community or produced by the business. This book offers a complete and up-to-date overview of the global standard on water footprint assessment as developed by the Water Footprint Network. More specifically it: o Provides a comprehensive set of methods for water footprint assessment o Shows how water footprints can be calculated for individual processes and products, as well as for consumers, nations and businesses o Contains detailed worked examples of how to calculate green, blue and grey water footprints o Describes how to assess the sustainability of the aggregated water footprint within a river basin or the water footprint of a specific product o Includes an extensive library of possible measures that can contribute to water footprint reduction

How to Change the World Aug 19 2021 David Bornstein's How to Change the World is the first book to study a remarkable and growing group of individuals around the world--what Bornstein calls social entrepreneurs. These men and women are bringing innovative, and successful, grass-roots approaches to a wide variety of social and economic problems, from rural poverty in India to discrimination against gypsies in Central Europe; from industrial pollution in the United States to child prostitution in Thailand. Like business entrepreneurs, social entrepreneurs are creative, driven, and adventurous. They embrace change, exploit new opportunities, and think big. In How to Change the World, Bornstein provides vivid profiles of many such individuals, looking at the personalities, strategies, and techniques they have in common. The book is an In Search of Excellence for social initiatives, intertwining personal stories, anecdotes, and analysis. Readers will see how social entrepreneurs bring about structural changes in their societies--in other words, how one human being can make a difference. The case studies in the book include Jody Williams, who won the Nobel Peace Prize for the international campaign against landmines she ran by e-mail from her Vermont home; Roberto Baggio, a 31-year old Brazilian who has established eighty computer schools in the slums of Brazil; and Diana Propper, who has used investment banking techniques to make American corporations responsive to environmental dangers. The paperback

edition will offer a new foreword by the author that shows how the concept of social entrepreneurship has expanded and unfolded over the last few years, including the Gates-Buffetts charitable partnership, the rise of Google, and the increased mainstream coverage of the subject. The book will also update the stories of individual social entrepreneurs that appeared in the cloth edition.

Popular Mechanics Dec 31 2019 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Manual on Human Rights and the Environment Sep 19 2021 Prepared by government experts from all 46 member states of the Council of Europe, this publication seeks to help promote a better understanding of the relationship between human rights and environmental issues by setting out details of relevant case-law of the European Court of Human Rights and the principles upon which these judgements are based. These include: the right to life (Article 2), the right to respect for family life (Article 8), the right to a fair trial and access to a court (Article 6) and the right to receive and impart information and ideas (Article 10) of the European Convention on Human Rights.
